

WRNIP1 / WHIP Antibody (Internal)
Rabbit Polyclonal Antibody
Catalog # ALS11369**Specification**

WRNIP1 / WHIP Antibody (Internal) - Product Information

Application	IHC
Primary Accession	O96S55
Reactivity	Human, Mouse, Rat, Monkey
Host	Rabbit
Clonality	Polyclonal
Calculated MW	72kDa KDa

WRNIP1 / WHIP Antibody (Internal) - Additional Information**Gene ID** 56897**Other Names**

ATPase WRNIP1, 3.6.1.3, Werner helicase-interacting protein 1, WRNIP1 (HGNC:20876)

Target/Specificity

An internal region of the WHIP1 protein. The immunogen sequence shows 100% homology to human WHIP1 (isoform 1) and WHIP2 (isoform 2) with predicted molecular weights of 72.2 kD and 69.5 kD, respectively. The immunogen sequence also shows 100% homolog ...

Reconstitution & Storage

+4°C or -20°C, Avoid repeated freezing and thawing.

Precautions

WRNIP1 / WHIP Antibody (Internal) is for research use only and not for use in diagnostic or therapeutic procedures.

WRNIP1 / WHIP Antibody (Internal) - Protein Information**Name** WRNIP1 ([HGNC:20876](#))**Function**

Functions as a modulator of initiation or reinitiation events during DNA polymerase delta-mediated DNA synthesis. In the presence of ATP, stimulation of DNA polymerase delta-mediated DNA synthesis is decreased. Also plays a role in the innate immune defense against viruses. Stabilizes the RIGI dsRNA interaction and promotes RIGI 'Lys- 63'-linked polyubiquitination. In turn, RIGI transmits the signal through mitochondrial MAVS.

Cellular Location

Nucleus. Cytoplasm. Note=Colocalizes with WRN in granular structures in the nucleus.

Tissue Location

Ubiquitously expressed.

WRNIP1 / WHIP Antibody (Internal) - Protocols

Provided below are standard protocols that you may find useful for product applications.

WRNIP1 / WHIP Antibody (Internal) - Images

Anti-WRNIP1 / WHIP antibody IHC of human kidney.

WRNIP1 / WHIP Antibody (Internal) - Background

Functions as a modulator for initiation or reinitiation events during DNA polymerase delta-mediated DNA synthesis. Has an intrinsic ATPase activity that functions as a sensor of DNA damage or of arrested replication forks and regulates the extent of DNA synthesis.
