

RIF1 Antibody (aa2406-2419)
Rabbit Polyclonal Antibody
Catalog # ALS11755**Specification****RIF1 Antibody (aa2406-2419) - Product Information**

Application	WB, IHC
Primary Accession	Q5UIP0
Reactivity	Human, Mouse
Host	Rabbit
Clonality	Polyclonal
Calculated MW	274kDa KDa

RIF1 Antibody (aa2406-2419) - Additional Information**Gene ID** 55183**Other Names**

Telomere-associated protein RIF1, Rap1-interacting factor 1 homolog, RIF1

Target/Specificity

Rif1

Reconstitution & Storage

Store vial at -20 C prior to opening. Dilute only prior to immediate use. For extended storage aliquot contents and freeze at -20 C or below. Avoid cycles of freezing and thawing.

Precautions

RIF1 Antibody (aa2406-2419) is for research use only and not for use in diagnostic or therapeutic procedures.

RIF1 Antibody (aa2406-2419) - Protein Information**Name** RIF1 {ECO:0000303|PubMed:15342490, ECO:0000312|HGNC:HGNC:23207}**Function**

Key regulator of TP53BP1 that plays a key role in the repair of double-strand DNA breaks (DSBs) in response to DNA damage: acts by promoting non-homologous end joining (NHEJ)-mediated repair of DSBs (PubMed: [15342490](http://www.uniprot.org/citations/15342490), PubMed: [28241136](http://www.uniprot.org/citations/28241136)). In response to DNA damage, interacts with ATM-phosphorylated TP53BP1 (PubMed: [23333306](http://www.uniprot.org/citations/23333306), PubMed: [28241136](http://www.uniprot.org/citations/28241136)). Interaction with TP53BP1 leads to dissociate the interaction between NUDT16L1/TIRR and TP53BP1, thereby unmasking the tandem Tudor-like domain of TP53BP1 and allowing recruitment to DNA DSBs (PubMed: [28241136](http://www.uniprot.org/citations/28241136)). Once recruited to DSBs, RIF1 and TP53BP1 act by promoting NHEJ-mediated repair of DSBs (PubMed: [28241136](http://www.uniprot.org/citations/28241136)).

[23333306](http://www.uniprot.org/citations/23333306)). In the same time, RIF1 and TP53BP1 specifically counteract the function of BRCA1 by blocking DSBs resection via homologous recombination (HR) during G1 phase (PubMed:[23333306](http://www.uniprot.org/citations/23333306)). Also required for immunoglobulin class-switch recombination (CSR) during antibody genesis, a process that involves the generation of DNA DSBs (By similarity). Promotes NHEJ of dysfunctional telomeres (By similarity).

Cellular Location

Nucleus. Chromosome {ECO:0000250|UniProtKB:Q6PR54}. Chromosome, telomere. Cytoplasm, cytoskeleton, spindle. Note=Following interaction with TP53BP1, recruited to sites of DNA damage, such as DSBs (By similarity). Exhibits ATM- and TP53BP1-dependent localization to uncapped or aberrant telomeres and to DNA double strand breaks (DSBs) (PubMed:15342490). Does not associate with normal telomere structures (PubMed:15342490, PubMed:15583028). Localizes to microtubules of the midzone of the mitotic spindle during anaphase, and to condensed chromosomes in telophase (PubMed:15583028) {ECO:0000250|UniProtKB:Q6PR54, ECO:0000269|PubMed:15342490, ECO:0000269|PubMed:15583028}

Tissue Location

Highly expressed in testis.

RIF1 Antibody (aa2406-2419) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

RIF1 Antibody (aa2406-2419) - Images

Anti-Rif1 Antibody - Western Blot.

Anti-RIF1 antibody IHC of human kidney.

Anti-RIF1 antibody IHC of human testis.

RIF1 Antibody (aa2406-2419) - Background

Required for checkpoint mediated arrest of cell cycle progression in response to DNA damage during S-phase (the intra-S- phase checkpoint). This checkpoint requires activation of at least 2 parallel pathways by the ATM kinase: one involves the MRN (MRE11A-RAD50-NBS1) complex, while the second requires CHEK2. RIF1 seems to act independently of both these pathways. Seems to play no role in either the G1/S or G2/M DNA damage checkpoints.
