

GZMB / Granzyme B Antibody (N-Terminus)
Rabbit Polyclonal Antibody
Catalog # ALS12472**Specification****GZMB / Granzyme B Antibody (N-Terminus) - Product Information**

Application	IHC
Primary Accession	P10144
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Calculated MW	28kDa KDa

GZMB / Granzyme B Antibody (N-Terminus) - Additional Information**Gene ID** 3002**Other Names**

Granzyme B, 3.4.21.79, C11, CTLA-1, Cathepsin G-like 1, CTSL1, Cytotoxic T-lymphocyte proteinase 2, Lymphocyte protease, Fragmentin-2, Granzyme-2, Human lymphocyte protein, HLP, SECT, T-cell serine protease 1-3E, GZMB, CGL1, CSPB, CTLA1, GRB

Reconstitution & Storage

+4°C or -20°C, Avoid repeated freezing and thawing.

Precautions

GZMB / Granzyme B Antibody (N-Terminus) is for research use only and not for use in diagnostic or therapeutic procedures.

GZMB / Granzyme B Antibody (N-Terminus) - Protein Information**Name** GZMB {ECO:0000303|PubMed:32188940, ECO:0000312|HGNC:HGNC:4709}**Function**

Abundant protease in the cytosolic granules of cytotoxic T- cells and NK-cells which activates caspase-independent pyroptosis when delivered into the target cell through the immunological synapse (PubMed:3262682, PubMed:3263427, PubMed:1985927). It cleaves after Asp (PubMed:8258716, PubMed:1985927). Once delivered into the target cell, acts by catalyzing cleavage of gasdermin-E (GSDME), releasing the pore-forming moiety of GSDME, thereby triggering pyroptosis and target cell death (PubMed:32188940, PubMed:31953257). Seems to be linked to an activation cascade of caspases (aspartate-specific cysteine proteases) responsible for apoptosis execution. Cleaves caspase-3, -9 and -10 (CASP3, CASP9 and CASP10, respectively) to

give rise to active enzymes mediating apoptosis (PubMed:9852092). Cleaves and activates CASP7 in response to bacterial infection, promoting plasma membrane repair (By similarity).

Cellular Location

Secreted. Cytolytic granule. Note=Delivered into the target cell by perforin (PubMed:20038786).

Volume

250 µl

GZMB / Granzyme B Antibody (N-Terminus) - Protocols

Provided below are standard protocols that you may find useful for product applications.

Anti-GZMB / Granzyme B antibody IHC of human spleen.

GZMB / Granzyme B Antibody (N-Terminus) - Background

This enzyme is necessary for target cell lysis in cell-mediated immune responses. It cleaves after Asp. Seems to be linked to an activation cascade of caspases (aspartate-specific cysteine proteases) responsible for apoptosis execution. Cleaves caspase-3, -7, -9 and 10 to give rise to active enzymes mediating apoptosis.
