

GH / Growth Hormone Antibody
Rabbit Polyclonal Antibody
Catalog # ALS12803**Specification**

GH / Growth Hormone Antibody - Product Information

Application	IHC
Primary Accession	P01241
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Calculated MW	25kDa KDa

GH / Growth Hormone Antibody - Additional Information**Gene ID** 2688**Other Names**

Somatotropin, Growth hormone, GH, GH-N, Growth hormone 1, Pituitary growth hormone, GH1

Reconstitution & Storage

Store at 2°C to 8°C degrees. Do not freeze.

Precautions

GH / Growth Hormone Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

GH / Growth Hormone Antibody - Protein Information**Name** GH1**Function**

Plays an important role in growth control. Its major role in stimulating body growth is to stimulate the liver and other tissues to secrete IGF-1. It stimulates both the differentiation and proliferation of myoblasts. It also stimulates amino acid uptake and protein synthesis in muscle and other tissues.

Cellular Location

Secreted.

Volume

50 µl

GH / Growth Hormone Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

GH / Growth Hormone Antibody - Images

Anti-Growth Hormone antibody IHC of human placenta.

GH / Growth Hormone Antibody - Background

Plays an important role in growth control. Its major role in stimulating body growth is to stimulate the liver and other tissues to secrete IGF-1. It stimulates both the differentiation and proliferation of myoblasts. It also stimulates amino acid uptake and protein synthesis in muscle and other tissues.
