

NCOA3 / SRC-3 / AIB1 Antibody Goat Polyclonal Antibody Catalog # ALS12986

Specification

NCOA3 / SRC-3 / AIB1 Antibody - Product Information

Application Primary Accession Reactivity

Host Clonality Calculated MW IHC <u>O9Y6O9</u> Human, Hamster, Monkey, Pig, Bovine, Dog Goat Polyclonal 155kDa KDa

NCOA3 / SRC-3 / AIB1 Antibody - Additional Information

Gene ID 8202

Other Names

Nuclear receptor coactivator 3, NCoA-3, 2.3.1.48, ACTR, Amplified in breast cancer 1 protein, AIB-1, CBP-interacting protein, pCIP, Class E basic helix-loop-helix protein 42, bHLHe42, Receptor-associated coactivator 3, RAC-3, Steroid receptor coactivator protein 3, SRC-3, Thyroid hormone receptor activator molecule 1, TRAM-1, NCOA3, AIB1, BHLHE42, RAC3, TRAM1

Target/Specificity Human NCOA3. This antibody is expected to recognise both reported isoforms (NP_006525.2; NP_858045.1)

Reconstitution & Storage Store at -20°C. Minimize freezing and thawing.

Precautions NCOA3 / SRC-3 / AIB1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

NCOA3 / SRC-3 / AIB1 Antibody - Protein Information

Name NCOA3

Synonyms AIB1, BHLHE42, RAC3, TRAM1

Function

Nuclear receptor coactivator that directly binds nuclear receptors and stimulates the transcriptional activities in a hormone- dependent fashion. Plays a central role in creating a multisubunit coactivator complex, which probably acts via remodeling of chromatin. Involved in the coactivation of different nuclear receptors, such as for steroids (GR and ER), retinoids (RARs and RXRs), thyroid hormone (TRs), vitamin D3 (VDR) and prostanoids (PPARs). Displays histone acetyltransferase activity. Also involved in the coactivation of the NF-kappa-B pathway via its

interaction with the NFKB1 subunit.

Cellular Location

Cytoplasm. Nucleus. Note=Mainly cytoplasmic and weakly nuclear. Upon TNF activation and subsequent phosphorylation, it translocates from the cytoplasm to the nucleus

Tissue Location

Widely expressed. High expression in heart, skeletal muscle, pancreas and placenta. Low expression in brain, and very low in lung, liver and kidney

NCOA3 / SRC-3 / AIB1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

NCOA3 / SRC-3 / AIB1 Antibody - Images

Anti-NCOA3 antibody IHC of human spleen.

NCOA3 / SRC-3 / AIB1 Antibody - Background

Nuclear receptor coactivator that directly binds nuclear receptors and stimulates the transcriptional activities in a hormone-dependent fashion. Plays a central role in creating a multisubunit coactivator complex, which probably acts via remodeling of chromatin. Involved in the coactivation of different nuclear receptors, such as for steroids (GR and ER), retinoids (RARs and RXRs), thyroid hormone (TRs), vitamin D3 (VDR) and prostanoids (PPARs). Displays histone acetyltransferase activity. Also involved in the coactivation of the NF-kappa-B pathway via its interaction with the NFKB1 subunit.
