

**ATR Antibody (clone 1E9)**  
**Mouse Monoclonal Antibody**  
**Catalog # ALS13280**

### Specification

#### ATR Antibody (clone 1E9) - Product Information

Application	IHC
Primary Accession	<a href="#">Q13535</a>
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Calculated MW	301kDa KDa

#### ATR Antibody (clone 1E9) - Additional Information

##### Gene ID 545

##### Other Names

Serine/threonine-protein kinase ATR, 2.7.11.1, Ataxia telangiectasia and Rad3-related protein, FRAP-related protein 1, ATR, FRP1

##### Reconstitution & Storage

Store at -20°C. Aliquot to avoid freeze/thaw cycles.

##### Precautions

ATR Antibody (clone 1E9) is for research use only and not for use in diagnostic or therapeutic procedures.

#### ATR Antibody (clone 1E9) - Protein Information

Name ATR {ECO:0000303|PubMed:14729973, ECO:0000312|HGNC:HGNC:882}

##### Function

Serine/threonine protein kinase which activates checkpoint signaling upon genotoxic stresses such as ionizing radiation (IR), ultraviolet light (UV), or DNA replication stalling, thereby acting as a DNA damage sensor (PubMed:<a href="http://www.uniprot.org/citations/10597277" target="\_blank">10597277</a>, PubMed:<a href="http://www.uniprot.org/citations/10608806" target="\_blank">10608806</a>, PubMed:<a href="http://www.uniprot.org/citations/10859164" target="\_blank">10859164</a>, PubMed:<a href="http://www.uniprot.org/citations/11721054" target="\_blank">11721054</a>, PubMed:<a href="http://www.uniprot.org/citations/12791985" target="\_blank">12791985</a>, PubMed:<a href="http://www.uniprot.org/citations/12814551" target="\_blank">12814551</a>, PubMed:<a href="http://www.uniprot.org/citations/14657349" target="\_blank">14657349</a>, PubMed:<a href="http://www.uniprot.org/citations/14729973" target="\_blank">14729973</a>, PubMed:<a href="http://www.uniprot.org/citations/14742437" target="\_blank">14742437</a>, PubMed:<a href="http://www.uniprot.org/citations/15210935" target="\_blank">15210935</a>, PubMed:<a href="http://www.uniprot.org/citations/15496423" target="\_blank">15496423</a>, PubMed:<a href="http://www.uniprot.org/citations/16260606" target="\_blank">16260606</a>, PubMed:<a href="http://www.uniprot.org/citations/21144835"

target="\_blank">>21144835</a>, PubMed:<a href="http://www.uniprot.org/citations/27723717" target="\_blank">>27723717</a>, PubMed:<a href="http://www.uniprot.org/citations/27723720" target="\_blank">>27723720</a>, PubMed:<a href="http://www.uniprot.org/citations/33848395" target="\_blank">>33848395</a>, PubMed:<a href="http://www.uniprot.org/citations/9427750" target="\_blank">>9427750</a>, PubMed:<a href="http://www.uniprot.org/citations/9636169" target="\_blank">>9636169</a>, PubMed:<a href="http://www.uniprot.org/citations/21777809" target="\_blank">>21777809</a>, PubMed:<a href="http://www.uniprot.org/citations/25083873" target="\_blank">>25083873</a>, PubMed:<a href="http://www.uniprot.org/citations/30139873" target="\_blank">>30139873</a>, PubMed:<a href="http://www.uniprot.org/citations/37788673" target="\_blank">>37788673</a>, PubMed:<a href="http://www.uniprot.org/citations/37832547" target="\_blank">>37832547</a>). Recognizes the substrate consensus sequence [ST]-Q (PubMed:<a href="http://www.uniprot.org/citations/10597277" target="\_blank">>10597277</a>, PubMed:<a href="http://www.uniprot.org/citations/10608806" target="\_blank">>10608806</a>, PubMed:<a href="http://www.uniprot.org/citations/10859164" target="\_blank">>10859164</a>, PubMed:<a href="http://www.uniprot.org/citations/11721054" target="\_blank">>11721054</a>, PubMed:<a href="http://www.uniprot.org/citations/12791985" target="\_blank">>12791985</a>, PubMed:<a href="http://www.uniprot.org/citations/12814551" target="\_blank">>12814551</a>, PubMed:<a href="http://www.uniprot.org/citations/14657349" target="\_blank">>14657349</a>, PubMed:<a href="http://www.uniprot.org/citations/14729973" target="\_blank">>14729973</a>, PubMed:<a href="http://www.uniprot.org/citations/14742437" target="\_blank">>14742437</a>, PubMed:<a href="http://www.uniprot.org/citations/15210935" target="\_blank">>15210935</a>, PubMed:<a href="http://www.uniprot.org/citations/15496423" target="\_blank">>15496423</a>, PubMed:<a href="http://www.uniprot.org/citations/16260606" target="\_blank">>16260606</a>, PubMed:<a href="http://www.uniprot.org/citations/21144835" target="\_blank">>21144835</a>, PubMed:<a href="http://www.uniprot.org/citations/27723717" target="\_blank">>27723717</a>, PubMed:<a href="http://www.uniprot.org/citations/27723720" target="\_blank">>27723720</a>, PubMed:<a href="http://www.uniprot.org/citations/33848395" target="\_blank">>33848395</a>, PubMed:<a href="http://www.uniprot.org/citations/9427750" target="\_blank">>9427750</a>, PubMed:<a href="http://www.uniprot.org/citations/9636169" target="\_blank">>9636169</a>). Phosphorylates BRCA1, CHEK1, MCM2, RAD17, RPA2, SMC1 and p53/TP53, which collectively inhibit DNA replication and mitosis and promote DNA repair, recombination and apoptosis (PubMed:<a href="http://www.uniprot.org/citations/9925639" target="\_blank">>9925639</a>, PubMed:<a href="http://www.uniprot.org/citations/11114888" target="\_blank">>11114888</a>, PubMed:<a href="http://www.uniprot.org/citations/11418864" target="\_blank">>11418864</a>, PubMed:<a href="http://www.uniprot.org/citations/11865061" target="\_blank">>11865061</a>, PubMed:<a href="http://www.uniprot.org/citations/21777809" target="\_blank">>21777809</a>, PubMed:<a href="http://www.uniprot.org/citations/25083873" target="\_blank">>25083873</a>). Phosphorylates 'Ser-139' of histone variant H2AX at sites of DNA damage, thereby regulating DNA damage response mechanism (PubMed:<a href="http://www.uniprot.org/citations/11673449" target="\_blank">>11673449</a>). Required for FANCD2 ubiquitination (PubMed:<a href="http://www.uniprot.org/citations/15314022" target="\_blank">>15314022</a>). Critical for maintenance of fragile site stability and efficient regulation of centrosome duplication (PubMed:<a href="http://www.uniprot.org/citations/12526805" target="\_blank">>12526805</a>). Acts as a regulator of the S-G2 transition by restricting the activity of CDK1 during S-phase to prevent premature entry into G2 (PubMed:<a href="http://www.uniprot.org/citations/30139873" target="\_blank">>30139873</a>). Acts as a regulator of the nuclear envelope integrity in response to DNA damage and stress (PubMed:<a href="http://www.uniprot.org/citations/25083873" target="\_blank">>25083873</a>, PubMed:<a href="http://www.uniprot.org/citations/37788673" target="\_blank">>37788673</a>, PubMed:<a href="http://www.uniprot.org/citations/37832547" target="\_blank">>37832547</a>). Acts as a mechanical stress sensor at the nuclear envelope: relocates to the nuclear envelope in response to mechanical stress and mediates a checkpoint via phosphorylation of CHEK1 (PubMed:<a href="http://www.uniprot.org/citations/25083873" target="\_blank">>25083873</a>). Also promotes nuclear envelope rupture in response to DNA damage by mediating phosphorylation of LMNA at 'Ser-282', leading to lamin disassembly (PubMed:<a href="http://www.uniprot.org/citations/37832547" target="\_blank">>37832547</a>). Involved in the inflammatory response to genome instability and double-stranded DNA breaks: acts by

localizing to micronuclei arising from genome instability and catalyzing phosphorylation of LMNA at 'Ser-395', priming LMNA for subsequent phosphorylation by CDK1 and micronuclei envelope rupture (PubMed:<a href="http://www.uniprot.org/citations/37788673" target="\_blank">37788673</a>). The rupture of micronuclear envelope triggers the cGAS-STING pathway thereby activating the type I interferon response and innate immunity (PubMed:<a href="http://www.uniprot.org/citations/37788673" target="\_blank">37788673</a>). Positively regulates the restart of stalled replication forks following activation by the KHDC3L-OOEP scaffold complex (By similarity).

#### **Cellular Location**

Nucleus. Chromosome. Nucleus envelope. Note=Depending on the cell type, it can also be found in PML nuclear bodies (PubMed:12814551). Recruited to chromatin during S-phase (PubMed:14871897). Redistributions to discrete nuclear foci upon DNA damage, hypoxia or replication fork stalling (PubMed:27723720). Relocalizes to the nuclear envelope in response to mechanical stress or DNA damage (PubMed:25083873, PubMed:37832547) Also localizes to the micronuclear envelope in response to genome instability (PubMed:37788673).

#### **Tissue Location**

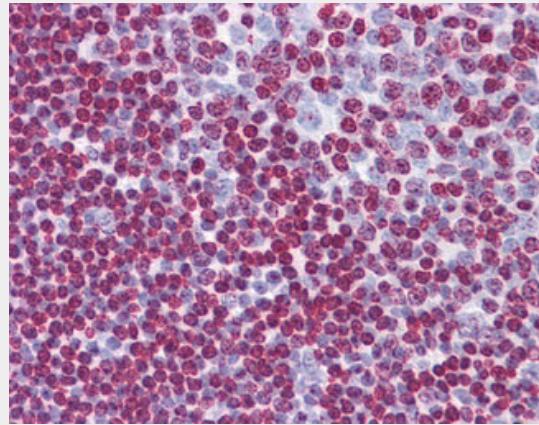

Ubiquitous, with highest expression in testis.

#### **ATR Antibody (clone 1E9) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

#### **ATR Antibody (clone 1E9) - Images**

Anti-ATR antibody IHC of human tonsil.

#### **ATR Antibody (clone 1E9) - Background**

Serine/threonine protein kinase which activates checkpoint signaling upon genotoxic stresses such as ionizing radiation (IR), ultraviolet light (UV), or DNA replication stalling, thereby acting as a DNA

damage sensor. Recognizes the substrate consensus sequence [ST]-Q. Phosphorylates BRCA1, CHEK1, MCM2, RAD17, RPA2, SMC1 and p53/TP53, which collectively inhibit DNA replication and mitosis and promote DNA repair, recombination and apoptosis. Phosphorylates 'Ser-139' of histone variant H2AX/H2AFX at sites of DNA damage, thereby regulating DNA damage response mechanism. Required for FANCD2 ubiquitination. Critical for maintenance of fragile site stability and efficient regulation of centrosome duplication.
