

CD79A Antibody (clone HM57)
Mouse Monoclonal Antibody
Catalog # ALS13471**Specification**

CD79A Antibody (clone HM57) - Product Information

Application	IHC
Primary Accession	P11912
Reactivity	Human, Mouse, Rat, Rabbit, Pig, Chicken, Opossum, Horse, Bovine, Guinea Pig
Host	Mouse
Clonality	Monoclonal
Calculated MW	25kDa KDa

CD79A Antibody (clone HM57) - Additional Information**Gene ID** 973**Other Names**

B-cell antigen receptor complex-associated protein alpha chain, Ig-alpha, MB-1 membrane glycoprotein, Membrane-bound immunoglobulin-associated protein, Surface IgM-associated protein, CD79a, CD79A, IGA, MB1

Target/Specificity

The antibody HM57 interacts with CD79a (Ig alpha), a 40-45 kD subunit of B cell antigen-specific receptor (BCR) and its early developmental forms. HLDA V; WS Code BC cB018. HLDA VI; WS Code BP 193. HLDA VI; WS Code BP 89. HLDA VI; WS Code B B103. HLD ...

Reconstitution & Storage

+4°C, avoid freezing

Precautions

CD79A Antibody (clone HM57) is for research use only and not for use in diagnostic or therapeutic procedures.

CD79A Antibody (clone HM57) - Protein Information**Name** CD79A**Synonyms** IGA, MB1**Function**

Required in cooperation with CD79B for initiation of the signal transduction cascade activated by binding of antigen to the B- cell antigen receptor complex (BCR) which leads to internalization of the complex, trafficking to late endosomes and antigen presentation. Also required for BCR surface expression and for efficient differentiation of pro- and pre-B-cells. Stimulates SYK autophosphorylation and activation. Binds to BLNK, bringing BLNK into proximity with SYK and allowing SYK to phosphorylate BLNK. Also interacts with and increases activity of some Src-family

tyrosine kinases. Represses BCR signaling during development of immature B- cells.

Cellular Location

Cell membrane; Single-pass type I membrane protein. Note=Following antigen binding, the BCR has been shown to translocate from detergent-soluble regions of the cell membrane to lipid rafts although signal transduction through the complex can also occur outside lipid rafts.

Tissue Location

B-cells.

CD79A Antibody (clone HM57) - Protocols

Provided below are standard protocols that you may find useful for product applications.
