

WDR77 / MEP50 Antibody (clone 3F10)
Mouse Monoclonal Antibody
Catalog # ALS13514**Specification**

WDR77 / MEP50 Antibody (clone 3F10) - Product Information

Application	WB, IHC
Primary Accession	O9BQA1
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Calculated MW	37kDa KDa

WDR77 / MEP50 Antibody (clone 3F10) - Additional Information**Gene ID** 79084**Other Names**

Methylosome protein 50, MEP-50, Androgen receptor cofactor p44, WD repeat-containing protein 77, p44/Mep50, WDR77, MEP50, WD45

Reconstitution & Storage

Store at -20°C. Aliquot to avoid freeze/thaw cycles.

Precautions

WDR77 / MEP50 Antibody (clone 3F10) is for research use only and not for use in diagnostic or therapeutic procedures.

WDR77 / MEP50 Antibody (clone 3F10) - Protein Information**Name** WDR77 ([HGNC:29652](#))**Function**

Non-catalytic component of the methylosome complex, composed of PRMT5, WDR77 and CLNS1A, which modifies specific arginines to dimethylarginines in several spliceosomal Sm proteins and histones (PubMed:11756452). This modification targets Sm proteins to the survival of motor neurons (SMN) complex for assembly into small nuclear ribonucleoprotein core particles. Might play a role in transcription regulation. The methylosome complex also methylates the Piwi proteins (PIWIL1, PIWIL2 and PIWIL4), methylation of Piwi proteins being required for the interaction with Tudor domain-containing proteins and subsequent localization to the meiotic nuage (PubMed:23071334).

Cellular Location

Nucleus. Cytoplasm. Note=Nuclear in Leydig cells and cytoplasmic in germ cells during fetal testicular development. In adult testis, predominantly nuclear. Subcellular location varies from nuclear to cytoplasmic in various tumors (PubMed:17437848).

Tissue Location

Highly expressed in heart, skeletal muscle, spleen, testis, uterus, prostate and thymus. In testis, expressed in germ cells and Leydig cells, but not in peritubular myocytes, nor in Sertoli cells. Expressed in prostate cancers, in seminomas and in Leydig cell tumors.

WDR77 / MEP50 Antibody (clone 3F10) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

WDR77 / MEP50 Antibody (clone 3F10) - Images

WDR77 monoclonal antibody (M01), clone 3F10 Western blot of WDR77 expression in HeLa.

Anti-WDR77 antibody IHC of human skeletal muscle.

WDR77 / MEP50 Antibody (clone 3F10) - Background

Non-catalytic component of the 20S PRMT5-containing methyltransferase complex, which modifies

specific arginines to dimethylarginines in several spliceosomal Sm proteins and histones. This modification targets Sm proteins to the survival of motor neurons (SMN) complex for assembly into small nuclear ribonucleoprotein core particles. Might play a role in transcription regulation. The 20S PRMT5-containing methyltransferase complex also methylates the Piwi proteins (PIWIL1, PIWIL2 and PIWIL4), methylation of Piwi proteins being required for the interaction with Tudor domain-containing proteins and subsequent localization to the meiotic nuage.
