KLHL15 Antibody (C-Terminus) - Protein Information**Name** KLHL15**Synonyms** KIAA1677**Function**

Substrate-specific adapter for CUL3 E3 ubiquitin-protein ligase complex (PubMed: [27561354](http://www.uniprot.org/citations/27561354), PubMed: [14528312](http://www.uniprot.org/citations/14528312), PubMed: [35219381](http://www.uniprot.org/citations/35219381)). Acts as an adapter for CUL3 to target the serine/threonine-protein phosphatase 2A (PP2A) subunit PPP2R5B for ubiquitination and subsequent proteasomal degradation, thus promoting exchange with other regulatory subunits (PubMed: [23135275](http://www.uniprot.org/citations/23135275)). Acts as an adapter for CUL3 to target the DNA-end resection factor RBBP8/CtIP for ubiquitination and subsequent proteasomal degradation (PubMed: [27561354](http://www.uniprot.org/citations/27561354), PubMed: [35219381](http://www.uniprot.org/citations/35219381)). Through the

regulation of RBBP8/CtIP protein turnover, plays a key role in DNA damage response, favoring DNA double-strand repair through error-prone non-homologous end joining (NHEJ) over error-free, RBBP8-mediated homologous recombination (HR) (PubMed:27561354, PubMed:35219381).
