**ARHGDIG / RHOGDI-3 Antibody (C-Terminus) - Protein Information****Name** ARHGDIG**Function**

Inhibits GDP/GTP exchange reaction of RhoB. Interacts specifically with the GDP- and GTP-bound forms of post-translationally processed RhoB and RhoG proteins, both of which show a growth-regulated expression in mammalian cells. Stimulates the release of the GDP-bound but not the GTP-bound RhoB protein. Also inhibits the GDP/GTP exchange of RhoB but shows less ability to inhibit the dissociation of prebound GTP.

**Cellular Location**

Cytoplasm.

**Tissue Location**

Primarily expressed in pancreas and brain.
