

ANP32B / APRIL Antibody (C-Terminus)
Goat Polyclonal Antibody
Catalog # ALS15773**Specification**

ANP32B / APRIL Antibody (C-Terminus) - Product Information

Application	IHC
Primary Accession	Q92688
Reactivity	Human, Mouse, Rat, Pig, Horse, Bovine, Dog
Host	Goat
Clonality	Polyclonal
Calculated MW	29kDa KDa

ANP32B / APRIL Antibody (C-Terminus) - Additional Information**Gene ID** 10541**Other Names**

Acidic leucine-rich nuclear phosphoprotein 32 family member B, Acidic protein rich in leucines, Putative HLA-DR-associated protein I-2, PHAPI2, Silver-stainable protein SSP29, ANP32B, APRIL, PHAPI2

Target/Specificity

Human ANP32B / APRIL. This antibody does NOT recognize the TNF family member also known as APRIL - Gene ID number 8741.

Reconstitution & Storage

Store at -20°C. Minimize freezing and thawing.

Precautions

ANP32B / APRIL Antibody (C-Terminus) is for research use only and not for use in diagnostic or therapeutic procedures.

ANP32B / APRIL Antibody (C-Terminus) - Protein Information**Name** ANP32B**Synonyms** APRIL, PHAPI2**Function**

Multifunctional protein that is involved in the regulation of many processes including cell proliferation, apoptosis, cell cycle progression or transcription (PubMed:20015864, PubMed:18039846). Regulates the proliferation of neuronal stem cells, differentiation of leukemic cells and progression from G1 to S phase of the cell cycle. As negative regulator of caspase-3-dependent apoptosis, may act as an antagonist of ANP32A in regulating tissue homeostasis (PubMed:<a

[20015864](http://www.uniprot.org/citations/20015864)). Exhibits histone chaperone properties, able to recruit histones to certain promoters, thus regulating the transcription of specific genes (PubMed: [20538007](http://www.uniprot.org/citations/20538007), PubMed: [18039846](http://www.uniprot.org/citations/18039846)). Also plays an essential role in the nucleocytoplasmic transport of specific mRNAs via the uncommon nuclear mRNA export receptor XPO1/CRM1 (PubMed: [17178712](http://www.uniprot.org/citations/17178712)). Participates in the regulation of adequate adaptive immune responses by acting on mRNA expression and cell proliferation (By similarity).

Cellular Location

[Isoform 1]: Nucleus. Cytoplasm Note=Accumulates in the nuclei at the S phase.

Tissue Location

Expressed in heart, lung, pancreas, prostate and in spleen, thymus and placenta.

ANP32B / APRIL Antibody (C-Terminus) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

Anti-ANP32B / APRIL antibody IHC staining of human breast.

ANP32B / APRIL Antibody (C-Terminus) - Background

Multifunctional protein working as a cell cycle progression factor as well as a cell survival factor. Required for the progression from the G1 to the S phase. Anti-apoptotic protein which functions as a caspase-3 inhibitor. Has no phosphatase 2A (PP2A) inhibitor activity (By similarity). Exhibits histone chaperone properties, stimulating core histones to assemble into a nucleosome.
