SPINK2 Antibody (C-Terminus) - Protein Information**Name** SPINK2**Function**

As a strong inhibitor of acrosin, it is required for normal spermiogenesis. It probably hinders premature activation of proacrosin and other proteases, thus preventing the cascade of events leading to spermiogenesis defects (PubMed:28554943). May be involved in the regulation of serine protease-dependent germ cell apoptosis (By similarity). It also inhibits trypsin.

Cellular Location

Secreted. Cytoplasmic vesicle, secretory vesicle, acrosome

Tissue Location

Expressed in epididymis (at protein level).
