

EMA / MUC1 Antibody (clone 175C5)
Mouse Monoclonal Antibody
Catalog # ALS16529**Specification**

EMA / MUC1 Antibody (clone 175C5) - Product Information

Application	IHC
Primary Accession	P15941
Other Accession	4582
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	IgG1
Calculated MW	122102

EMA / MUC1 Antibody (clone 175C5) - Additional Information**Gene ID** 4582**Other Names**

MUC1, CA15-3, CD227, Carcinoma-associated mucin, CD227 antigen, DF3 antigen, Episialin, Epithelial membrane antigen, H23 antigen, H23AG, Krebs von den Lungen-6, MAM6, MUC1/ZD, MUC-1/SEC, Mucin-1, Pem, KL-6, MUC-1/X, Tumor-associated mucin, Peanut-rea ...

Target/Specificity

shows a high preference for breast carcinomas relative to normal breast epithelium. The antibody reacts with a carcinoma-associated antigen in both adenocarcinomas and squamous cell carcinomas of different origins.

Reconstitution & Storage

PBS containing 0.09% sodium azide. Short term 4°C, long term aliquot and store at -20°C, avoid freeze thaw cycles.

Precautions

EMA / MUC1 Antibody (clone 175C5) is for research use only and not for use in diagnostic or therapeutic procedures.

EMA / MUC1 Antibody (clone 175C5) - Protein Information**Name** MUC1**Synonyms** PUM**Function**

The alpha subunit has cell adhesive properties. Can act both as an adhesion and an anti-adhesion protein. May provide a protective layer on epithelial cells against bacterial and enzyme attack.

Cellular Location

Apical cell membrane; Single-pass type I membrane protein. Note=Exclusively located in the apical domain of the plasma membrane of highly polarized epithelial cells After endocytosis, internalized and recycled to the cell membrane Located to microvilli and to the tips of long filopodial protusions [Isoform Y]: Secreted. [Mucin-1 subunit beta]: Cell membrane. Cytoplasm. Nucleus. Note=On EGF and PDGFRB stimulation, transported to the nucleus through interaction with CTNNB1, a process which is stimulated by phosphorylation. On HRG stimulation, colocalizes with JUP/gamma-catenin at the nucleus

Tissue Location

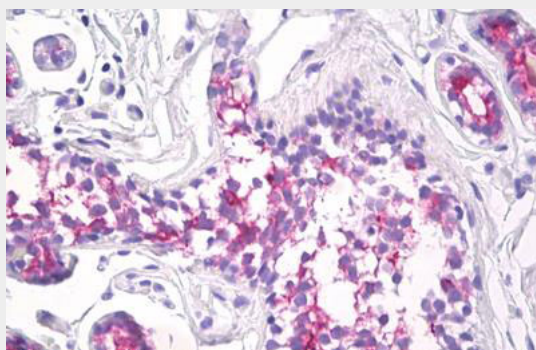

Expressed on the apical surface of epithelial cells, especially of airway passages, breast and uterus. Also expressed in activated and unactivated T-cells. Overexpressed in epithelial tumors, such as breast or ovarian cancer and also in non-epithelial tumor cells. Isoform Y is expressed in tumor cells only

EMA / MUC1 Antibody (clone 175C5) - Protocols

Provided below are standard protocols that you may find useful for product applications.
