**Anti-PGRMC1 / MPR Antibody - Protein Information****Name** PGRMC1 ([HGNC:16090](#))**Function**

Component of a progesterone-binding protein complex (PubMed:<a href="http://www.uniprot.org/citations/28396637" target="\_blank">28396637</a>). Binds progesterone (PubMed:<a href="http://www.uniprot.org/citations/25675345" target="\_blank">25675345</a>). Has many reported cellular functions (heme homeostasis, interaction with CYPs). Required for the maintenance of uterine histoarchitecture and normal female reproductive lifespan (By similarity). Intracellular heme chaperone. Regulates heme synthesis via interactions with FECH and acts as a heme donor for at least some hemoproteins (PubMed:<a href="http://www.uniprot.org/citations/27599036" target="\_blank">27599036</a>). Forms a ternary complex with TMEM97 receptor and low density lipid receptor/LDLR, which increases LDLR-mediated LDL lipoprotein internalization (PubMed:<a

href="http://www.uniprot.org/citations/30443021" target="\_blank">30443021</a>).

**Cellular Location**

Microsome membrane {ECO:0000250|UniProtKB:Q95250}; Single-pass membrane protein. Smooth endoplasmic reticulum membrane; Single-pass membrane protein. Mitochondrion outer membrane {ECO:0000250|UniProtKB:O55022}; Single-pass membrane protein; Extracellular side {ECO:0000250|UniProtKB:O55022} Secreted Note=Localized at cell membrane, probably in lipid rafts, in serum- starved conditions.

**Tissue Location**

Detected in urine (at protein level) (PubMed:36213313, PubMed:37453717). Expressed by endometrial glands and stroma (at protein level) (PubMed:23793472). Widely expressed, with highest expression in liver and kidney.
