Anti-MCAD / ACADM Antibody (aa134-183)

Rabbit Anti Human Polyclonal Antibody
Catalog # ALS18373

Specification

Anti-MCAD / ACADM Antibody (aa134-183) - Product Information

Application	**WB, IHC-P, E**
Primary Accession	P11310
Predicted	**Human, Mouse, Rat**
Host	**Rabbit**
Clonality	**Polyclonal**
Isotype	**IgG**
Calculated MW	**46588**

Anti-MCAD / ACADM Antibody (aa134-183) - Additional Information

Gene ID 34

Alias Symbol	**ACADM**

Other Names
ACADM, ACAD1, MCAD, MCADH

Target/Specificity
MCAD antibody detects endogenous levels of MCAD.

Reconstitution & Storage
Immunoaffinity purified

Precautions
Anti-MCAD / ACADM Antibody (aa134-183) is for research use only and not for use in diagnostic or therapeutic procedures.

Anti-MCAD / ACADM Antibody (aa134-183) - Protein Information

Name ACADM (HGNC:89)

Function
Medium-chain specific acyl-CoA dehydrogenase is one of the acyl-CoA dehydrogenases that catalyze the first step of mitochondrial fatty acid beta-oxidation, an aerobic process breaking down fatty acids into acetyl-CoA and allowing the production of energy from fats (PubMed:1970566, PubMed:8823175, PubMed:21237683, PubMed:2251268). The first step of fatty acid beta-oxidation consists in the removal of one hydrogen from C-2 and C-3 of the straight-chain fatty acyl-CoA thioester, resulting in the formation of trans-2-enoyl-CoA (PubMed:2251268). Electron transfer flavoprotein (ETF) is the electron acceptor that transfers electrons to the main

mitochondrial respiratory chain via ETF-ubiquinone oxidoreductase (ETF dehydrogenase) (PubMed:25416781, PubMed:15159392). Among the different mitochondrial acyl-CoA dehydrogenases, medium-chain specific acyl-CoA dehydrogenase acts specifically on acyl-CoAs with saturated 6 to 12 carbons long primary chains (PubMed:1970566, PubMed:8823175, PubMed:21237683, PubMed:2251268).

Cellular Location
Mitochondrion matrix

Anti-MCAD / ACADM Antibody (aa134-183) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
