

Rat Npm1 Antibody (Ascites)
Purified Mouse Monoclonal Antibody (Mab)
Catalog # AM1837a

Specification

Rat Npm1 Antibody (Ascites) - Product Information

Application	WB,E
Primary Accession	P13084
Reactivity	Human, Rat
Host	Mouse
Clonality	Monoclonal
Isotype	IgG1,Igk

Rat Npm1 Antibody (Ascites) - Additional Information

Gene ID 25498

Other Names

Nucleophosmin, NPM, Nucleolar phosphoprotein B23, Nucleolar protein NO38, Numatrin, Npm1

Target/Specificity

This RAT NPM antibody is generated from mouse immunized with RAT NPM recombinant protein.

Dilution

WB~~1:500~2000

Format

Mouse monoclonal antibody supplied in crude ascites with 0.09% (W/V) sodium azide.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Rat Npm1 Antibody (Ascites) is for research use only and not for use in diagnostic or therapeutic procedures.

Rat Npm1 Antibody (Ascites) - Protein Information

Name Npm1

Function Involved in diverse cellular processes such as ribosome biogenesis, centrosome duplication, protein chaperoning, histone assembly, cell proliferation, and regulation of tumor suppressors p53/TP53 and ARF. Binds ribosome presumably to drive ribosome nuclear export. Associated with nucleolar ribonucleoprotein structures and bind single-stranded nucleic acids. Acts as a chaperonin for the core histones H3, H2B and H4. Stimulates APEX1 endonuclease activity on apurinic/apyrimidinic (AP) double-stranded DNA but inhibits APEX1 endonuclease activity on AP single-stranded RNA. May exert a control of APEX1 endonuclease activity within nucleoli devoted

to repair AP on rDNA and the removal of oxidized rRNA molecules. In concert with BRCA2, regulates centrosome duplication. Regulates centriole duplication: phosphorylation by PLK2 is able to trigger centriole replication. Negatively regulates the activation of EIF2AK2/PKR and suppresses apoptosis through inhibition of EIF2AK2/PKR autophosphorylation. Antagonizes the inhibitory effect of ATF5 on cell proliferation and relieves ATF5-induced G2/M blockade. In complex with MYC enhances the transcription of MYC target genes (By similarity). May act as chaperonin or cotransporter in the nucleolar localization of transcription termination factor TTF1 (By similarity).

Cellular Location

Nucleus, nucleolus {ECO:0000250|UniProtKB:P06748}. Nucleus, nucleoplasm {ECO:0000250|UniProtKB:P06748}. Cytoplasm, cytoskeleton, microtubule organizing center, centrosome {ECO:0000250|UniProtKB:P06748} Note=Generally nucleolar, but is translocated to the nucleoplasm in case of serum starvation or treatment with anticancer drugs. Can shuttle between cytoplasm and nucleus. Co-localizes with the methylated form of RPS10 in the granular component (GC) region of the nucleolus Colocalized with nucleolin and APEX1 in nucleoli. NEK2 is required for its localization to the centrosome during mitosis {ECO:0000250|UniProtKB:P06748}

Rat Npm1 Antibody (Ascites) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

Rat Npm1 Antibody (Ascites) - Images

Western blot analysis of RAT Npm1 Antibody (Cat. #AM1837a) in rat heart tissue lysates (35µg/lane).NPM (arrow) was detected using the purified Mab.(1:2000)

Rat Npm1 Antibody (Ascites) - Background

RNA-associated nucleolar phosphoprotein; involved in ribosome assembly [RGD]
