

TSC2 Antibody
Mouse Monoclonal Antibody (Mab)
Catalog # AM1919B**Specification**

TSC2 Antibody - Product Information

Application	IF, WB,E
Primary Accession	P49815
Other Accession	NP_000539.2 , NP_001070651.1
Reactivity	Mouse
Host	Mouse
Clonality	Monoclonal
Isotype	IgG1,k

TSC2 Antibody - Additional Information**Gene ID** 7249**Other Names**

Tuberin, Tuberous sclerosis 2 protein, TSC2, TSC4

Target/Specificity

This TSC2 monoclonal antibody is generated from mouse immunized with TSC2 recombinant protein.

Dilution

IF~~1:10~50

WB~~1:100

Format

Purified monoclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein G column, followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

TSC2 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

TSC2 Antibody - Protein Information**Name** TSC2 {ECO:0000303|PubMed:7558029, ECO:0000312|HGNC:HGNC:12363}

Function Catalytic component of the TSC-TBC complex, a multiprotein complex that acts as a negative regulator of the canonical mTORC1 complex, an evolutionarily conserved central nutrient sensor that stimulates anabolic reactions and macromolecule biosynthesis to promote cellular biomass generation and growth (PubMed:[12172553](#), PubMed:[12271141](#), PubMed:[12906785](#),

PubMed:[12842888](#), PubMed:[28215400](#), PubMed:[35772404](#), PubMed:[15340059](#), PubMed:[22819219](#), PubMed:[24529379](#), PubMed:[33436626](#)). Within the TSC-TBC complex, TSC2 acts as a GTPase- activating protein (GAP) for the small GTPase RHEB, a direct activator of the protein kinase activity of mTORC1 (PubMed:[12172553](#), PubMed:[12906785](#), PubMed:[12842888](#), PubMed:[15340059](#), PubMed:[12820960](#), PubMed:[22819219](#), PubMed:[24529379](#), PubMed:[33436626](#)). In absence of nutrients, the TSC-TBC complex inhibits mTORC1, thereby preventing phosphorylation of ribosomal protein S6 kinase (RPS6KB1 and RPS6KB2) and EIF4EBP1 (4E-BP1) by the mTORC1 signaling (PubMed:[12172553](#), PubMed:[12271141](#), PubMed:[12906785](#), PubMed:[12842888](#), PubMed:[22819219](#), PubMed:[24529379](#), PubMed:[28215400](#), PubMed:[35772404](#)). The TSC-TBC complex is inactivated in response to nutrients, relieving inhibition of mTORC1 (PubMed:[12172553](#), PubMed:[24529379](#)). Involved in microtubule-mediated protein transport via its ability to regulate mTORC1 signaling (By similarity). Also stimulates the intrinsic GTPase activity of the Ras- related proteins RAP1A and RAB5 (By similarity).

Cellular Location

Lysosomal membrane; Peripheral membrane protein. Cytoplasm, cytosol Note=Recruited to lysosomal membranes in a RHEB-dependent process in absence of nutrients (PubMed:24529379). In response to insulin signaling and phosphorylation by PKB/AKT1, the complex dissociates from lysosomal membranes and relocates to the cytosol (PubMed:24529379)

Tissue Location

Liver, brain, heart, lymphocytes, fibroblasts, biliary epithelium, pancreas, skeletal muscle, kidney, lung and placenta.

TSC2 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

TSC2 Antibody - Images

Fluorescent image of HeLa cell stained with TSC2 Antibody (Cat#AM1919b/SG110509AA). HeLa cells were fixed with 4% PFA (20 min), permeabilized with Triton X-100 (0.1%, 10 min), then incubated with TSC2 primary antibody (1:25, 1 h at 37°C. For secondary antibody, Alexa Fluor® 488 conjugated donkey anti-mouse antibody (green) was used (1:400, 50 min at 37°C. Cytoplasmic actin was counterstained with Alexa Fluor® 555 (red) conjugated Phalloidin (7 units/ml, 1 h at 37°C. Nuclei were counterstained with DAPI (blue) (10 µg/ml, 10 min). TSC2 immunoreactivity is localized to Microtubules significantly.

TSC2 Antibody (Cat. #AM1919b) western blot analysis in mouse NIH-3T3 cell line lysates (35 µg/lane). This demonstrates the TSC2 antibody detected the TSC2 protein (arrow).

TSC2 Antibody - Background

Mutations in this gene lead to tuberous sclerosis complex. Its gene product is believed to be a tumor suppressor and is able to stimulate specific GTPases. The protein associates with hamartin in a cytosolic complex, possibly acting as a chaperone for hamartin. Alternative splicing results in multiple transcript variants encoding different isoforms.
