

### ENO1 Antibody

Mouse Monoclonal Antibody (Mab) Catalog # AM2192b

## Specification

# **ENO1** Antibody - Product Information

Application Primary Accession Reactivity Host Clonality Isotype WB, IHC-P,E <u>P06733</u> Human, Mouse Mouse Monoclonal IgG (k)

## **ENO1** Antibody - Additional Information

Gene ID 2023

#### **Other Names**

Alpha-enolase, 2-phospho-D-glycerate hydro-lyase, C-myc promoter-binding protein, Enolase 1, MBP-1, MPB-1, Non-neural enolase, NNE, Phosphopyruvate hydratase, Plasminogen-binding protein, ENO1, ENO1L1, MBPB1, MPB1

**Target/Specificity** Purified His-tagged ENO1 protein was used to produced this monoclonal antibody.

**Dilution** WB~~1:1000 IHC-P~~1:25

Format

Purified monoclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein G column, followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

ENO1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

# **ENO1** Antibody - Protein Information

Name ENO1

Synonyms ENO1L1, MBPB1, MPB1

**Function** Glycolytic enzyme the catalyzes the conversion of 2- phosphoglycerate to phosphoenolpyruvate (PubMed:<u>29775581</u>, PubMed:<u>1369209</u>). In addition to glycolysis, involved in

various processes such as growth control, hypoxia tolerance and allergic responses (PubMed:<u>2005901</u>, PubMed:<u>10802057</u>, PubMed:<u>12666133</u>, PubMed:<u>29775581</u>). May also function in the intravascular and pericellular fibrinolytic system due to its ability to serve as a receptor and activator of plasminogen on the cell surface of several cell-types such as leukocytes and neurons (PubMed:<u>12666133</u>). Stimulates immunoglobulin production (PubMed:<u>1369209</u>).

#### **Cellular Location**

Cytoplasm. Cell membrane. Cytoplasm, myofibril, sarcomere, M line. Note=Can translocate to the plasma membrane in either the homodimeric (alpha/alpha) or heterodimeric (alpha/gamma) form. ENO1 is localized to the M line

#### **Tissue Location**

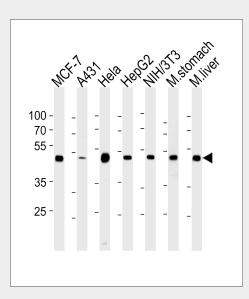

The alpha/alpha homodimer is expressed in embryo and in most adult tissues. The alpha/beta heterodimer and the beta/beta homodimer are found in striated muscle, and the alpha/gamma heterodimer and the gamma/gamma homodimer in neurons

## **ENO1 Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

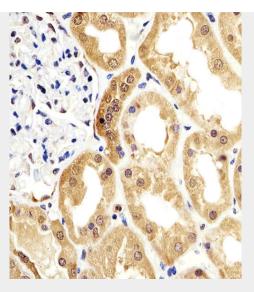

- <u>Western Blot</u>
- <u>Blocking Peptides</u>
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

### ENO1 Antibody - Images

ENO1 Antibody (Cat. #AM2192b) western blot analysis in MCF-7,A431,Hela,HepG2,mouse NIH/3T3 cell line and mouse stomach,liver tissue lysates (35µg/lane).This demonstrates the ENO1 antibody detected the ENO1 protein (arrow).

Immunohistochemical analysis of paraffin-embedded H. kideny section using ENO1 Antibody(Cat#AM2192b). AM2192b was diluted at 1:25 dilution. A undiluted biotinylated goat polyvalent antibody was used as the secondary, followed by DAB staining.

# ENO1 Antibody - Background

Multifunctional enzyme that, as well as its role in glycolysis, plays a part in various processes such as growth control, hypoxia tolerance and allergic responses. May also function in the intravascular and pericellular fibrinolytic system due to its ability to serve as a receptor and activator of plasminogen on the cell surface of several cell-types such as leukocytes and neurons. Stimulates immunoglobulin production.

MBP1 binds to the myc promoter and acts as a transcriptional repressor. May be a tumor suppressor.
