

Actin Antibody
Mouse monoclonal antibody
Catalog # AN1169**Specification**

Actin Antibody - Product Information

Application	WB
Primary Accession	P68139
Reactivity	All Species
Host	Mouse
Clonality	monoclonal
Isotype	IgG1
Calculated MW	42 KDa

Actin Antibody - Additional Information

Gene ID	421534
Gene Name	ACTA1

Other Names

Actin, alpha skeletal muscle, Alpha-actin-1, ACTA1, ACTA

Target/Specificity

Preparation of chicken gizzard actin.

Dilution

WB~~ 1:5000

Format

Unpurified ascites fluid.

Antibody Specificity

Specific for the ~42 kDa actin protein in lysates from skeletal, cardiac, gizzard and aorta tissues. Reacts with all actin isoforms.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Actin Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Shipping

Blue Ice

Actin Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

Actin Antibody - Images

Western blot of rat hippocampal homogenate showing specific immunolabeling of the ~ 42k actin protein.

Actin Antibody - Background

Actin is the most abundant protein found in virtually all eukaryotic cells. It is also one of the most highly-conserved proteins, differing by no more than 20% in species as diverse as algae and humans, making it an excellent choice for use as a loading control. It is the monomeric subunit of microfilaments, one of the three major components of the cytoskeleton, and of thin filaments, which are part of the contractile apparatus in muscle cells. Thus, actin participates in many important cellular functions, including muscle contraction, cell motility, cell division and cytokinesis, vesicle and organelle movement, cell signaling, and the establishment and maintenance of cell junctions and cell shape.
