

SARS-E2 Antibody
Purified Mouse Monoclonal Antibody
Catalog # AO1018a**Specification**

SARS-E2 Antibody - Product Information

Application	WB
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	IgG1

Description

SARS (severe acute respiratory syndrome) is caused by a human coronavirus. Human coronaviruses are the major cause of upper respiratory tract illness, such as the common cold, in humans. Coronaviruses are positive-stranded RNA viruses, featuring the largest viral RNA genomes known to date (27-31 kb). The complete sequence of the SARS virus release the coronavirus contains 25 open reading frames. SARS-E2 glycoprotein precursor is a 139-kDa glycoprotein. It contains a superantigen between residues 690 through 1050 which has relationship to T-cell Receptor alpha-beta V chain protein.

Immunogen

Purified recombinant fragment of SARS-E2 glycoprotein precursor expressed in E. Coli.

Formulation

Subclonal supernatant.

SARS-E2 Antibody - Additional Information**Dilution**

WB~~1/500 - 1/2000

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

SARS-E2 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

SARS-E2 Antibody - Protein Information**SARS-E2 Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.
