

**ERN1 Antibody**  
**Purified Mouse Monoclonal Antibody**  
**Catalog # AO1379a**

**Specification**

**ERN1 Antibody - Product Information**

Application	WB, IHC
Primary Accession	<a href="#">075460</a>
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	IgG1
Calculated MW	109kDa KDa

**Description**

The protein encoded by this gene is the ER to nucleus signalling 1 protein, a human homologue of the yeast Ire1 gene product. This protein possesses intrinsic kinase activity and an endoribonuclease activity and it is important in altering gene expression as a response to endoplasmic reticulum-based stress signals.

**Immunogen**

Purified recombinant fragment of human ERN1(aa282-433) expressed in E. Coli. <br />

**Formulation**

Ascitic fluid containing 0.03% sodium azide. <br />

**ERN1 Antibody - Additional Information**

**Gene ID 2081**

**Other Names**

Serine/threonine-protein kinase/endoribonuclease IRE1, Endoplasmic reticulum-to-nucleus signaling 1, Inositol-requiring protein 1, hIRE1p, Ire1-alpha, IRE1a, Serine/threonine-protein kinase, 2.7.11.1, Endoribonuclease, 3.1.26.-, ERN1 (<a href="[http://www.genenames.org/cgi-bin/gene\\_symbol\\_report?hgnc\\_id=3449](http://www.genenames.org/cgi-bin/gene_symbol_report?hgnc_id=3449)" target="\_blank">HGNC:3449</a>)

**Dilution**

WB~~1/500 - 1/2000

IHC~~1/500 - 1/2000

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

ERN1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**ERN1 Antibody - Protein Information**

## Name ERN1 ([HGNC:3449](#))

### Function

Serine/threonine-protein kinase and endoribonuclease that acts as a key sensor for the endoplasmic reticulum unfolded protein response (UPR) (PubMed:<a href="http://www.uniprot.org/citations/11175748" target="\_blank">11175748</a>, PubMed:<a href="http://www.uniprot.org/citations/11779464" target="\_blank">11779464</a>, PubMed:<a href="http://www.uniprot.org/citations/12637535" target="\_blank">12637535</a>, PubMed:<a href="http://www.uniprot.org/citations/21317875" target="\_blank">21317875</a>, PubMed:<a href="http://www.uniprot.org/citations/28128204" target="\_blank">28128204</a>, PubMed:<a href="http://www.uniprot.org/citations/9637683" target="\_blank">9637683</a>, PubMed:<a href="http://www.uniprot.org/citations/30118681" target="\_blank">30118681</a>). In unstressed cells, the endoplasmic reticulum luminal domain is maintained in its inactive monomeric state by binding to the endoplasmic reticulum chaperone HSPA5/BiP (PubMed:<a href="http://www.uniprot.org/citations/21317875" target="\_blank">21317875</a>). Accumulation of misfolded proteins in the endoplasmic reticulum causes release of HSPA5/BiP, allowing the luminal domain to homodimerize, promoting autophosphorylation of the kinase domain and subsequent activation of the endoribonuclease activity (PubMed:<a href="http://www.uniprot.org/citations/21317875" target="\_blank">21317875</a>). The endoribonuclease activity is specific for XBP1 mRNA and excises 26 nucleotides from XBP1 mRNA (PubMed:<a href="http://www.uniprot.org/citations/11779464" target="\_blank">11779464</a>, PubMed:<a href="http://www.uniprot.org/citations/24508390" target="\_blank">24508390</a>, PubMed:<a href="http://www.uniprot.org/citations/21317875" target="\_blank">21317875</a>). The resulting spliced transcript of XBP1 encodes a transcriptional activator protein that up-regulates expression of UPR target genes (PubMed:<a href="http://www.uniprot.org/citations/11779464" target="\_blank">11779464</a>, PubMed:<a href="http://www.uniprot.org/citations/24508390" target="\_blank">24508390</a>, PubMed:<a href="http://www.uniprot.org/citations/21317875" target="\_blank">21317875</a>). Acts as an upstream signal for ER stress-induced GORASP2-mediated unconventional (ER/Golgi-independent) trafficking of CFTR to cell membrane by modulating the expression and localization of SEC16A (PubMed:<a href="http://www.uniprot.org/citations/21884936" target="\_blank">21884936</a>, PubMed:<a href="http://www.uniprot.org/citations/28067262" target="\_blank">28067262</a>).

### Cellular Location

Endoplasmic reticulum membrane; Single-pass type I membrane protein

### Tissue Location

Ubiquitously expressed. High levels observed in pancreatic tissue.

## ERN1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

## ERN1 Antibody - Images

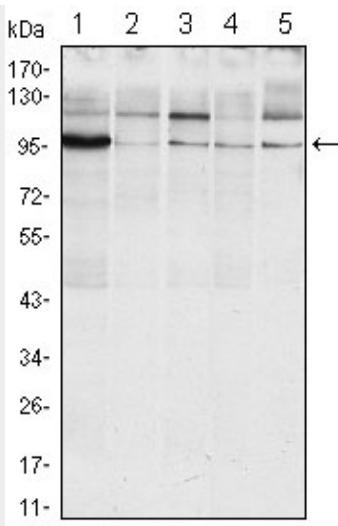

Figure 1: Western blot analysis using ERN1 mouse mAb against Raji (1), A431 (2), Jurkat (3), HeLa(4) and HEK293 (5) cell lysate.

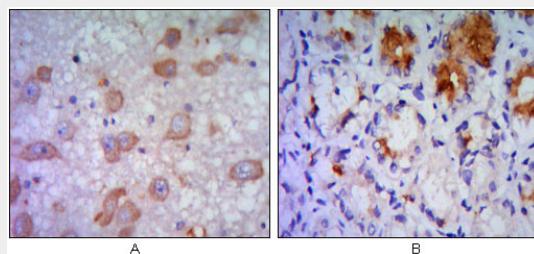

Figure 2: Immunohistochemical analysis of paraffin-embedded human brain tissue (A) and stomach tissue (B), showing cytoplasmic localization using ERN1 mouse mAb with DAB staining.

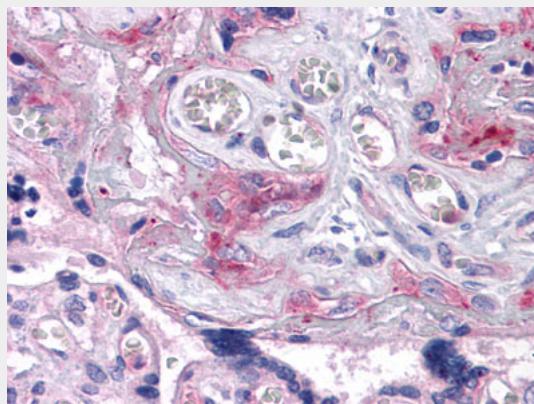

Figure 3: Immunohistochemical analysis of paraffin-embedded human Placenta tissues using ERN1 mouse mAb
