

**EEF2 Antibody**  
**Purified Mouse Monoclonal Antibody**  
**Catalog # AO1541a****Specification****EEF2 Antibody - Product Information**

Application	E, WB, IHC, IF
Primary Accession	<a href="#">P13639</a>
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	IgG1
Calculated MW	95kDa KDa

**Description**

This gene encodes a member of the GTP-binding translation elongation factor family. This protein is an essential factor for protein synthesis. It promotes the GTP-dependent translocation of the nascent protein chain from the A-site to the P-site of the ribosome. This protein is completely inactivated by EF-2 kinase phosphorylation. (provided by RefSeq)

**Immunogen**

Purified recombinant fragment of human EEF2 expressed in E. Coli. <br />

**Formulation**

Ascitic fluid containing 0.03% sodium azide.

**EEF2 Antibody - Additional Information**

**Gene ID** 1938

**Other Names**

Elongation factor 2, EF-2, EEF2, EF2

**Dilution**

E~~1/10000  
WB~~1/500 - 1/2000  
IHC~~1/200 - 1/1000  
IF~~1/200 - 1/1000

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

EEF2 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**EEF2 Antibody - Protein Information**

**Name** EEF2

**Synonyms** EF2

### Function

Catalyzes the GTP-dependent ribosomal translocation step during translation elongation (PubMed:<a href="http://www.uniprot.org/citations/26593721" target="\_blank">26593721</a>). During this step, the ribosome changes from the pre-translocational (PRE) to the post-translocational (POST) state as the newly formed A-site-bound peptidyl- tRNA and P-site-bound deacylated tRNA move to the P and E sites, respectively (PubMed:<a href="http://www.uniprot.org/citations/26593721" target="\_blank">26593721</a>). Catalyzes the coordinated movement of the two tRNA molecules, the mRNA and conformational changes in the ribosome (PubMed:<a href="http://www.uniprot.org/citations/26593721" target="\_blank">26593721</a>).

### Cellular Location

Cytoplasm. Nucleus. Note=Phosphorylation by CSK promotes cleavage and SUMOylation-dependent nuclear translocation of the C- terminal cleavage product.

### EEF2 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
