

**SYCP3 Antibody**  
**Purified Mouse Monoclonal Antibody**  
**Catalog # AO1855a****Specification****SYCP3 Antibody - Product Information**

Application	E, WB, IF, FC, IHC
Primary Accession	<a href="#">Q8IZU3</a>
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	IgG1
Calculated MW	27.7kDa KDa

**Description**

This gene encodes an essential structural component of the synaptonemal complex. This complex is involved in synapsis, recombination and segregation of meiotic chromosomes. Mutations in this gene are associated with azoospermia in males and susceptibility to pregnancy loss in females. Alternate splicing results in multiple transcript variants that encode the same protein.

**Immunogen**

Purified recombinant fragment of human SYCP3 (AA: 27-128) expressed in E. Coli.

**Formulation**

Purified antibody in PBS with 0.05% sodium azide

**SYCP3 Antibody - Additional Information**

**Gene ID** 50511

**Other Names**

Synaptonemal complex protein 3, SCP-3, SYCP3, SCP3

**Dilution**

E~~1/10000  
WB~~1/500 - 1/2000  
IF~~1/200 - 1/1000  
FC~~1/200 - 1/400  
IHC~~1/200 - 1/1000

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

SYCP3 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**SYCP3 Antibody - Protein Information**

**Name** SYCP3

**Synonyms** SCP3

**Function**

Component of the synaptonemal complexes (SCS), formed between homologous chromosomes during meiotic prophase. Required for centromere pairing during meiosis in male germ cells (By similarity). Required for normal meiosis during spermatogenesis and male fertility (PubMed:<a href="http://www.uniprot.org/citations/14643120" target="\_blank">14643120</a>). Plays a lesser role in female fertility. Required for efficient phosphorylation of HORMAD1 and HORMAD2 (By similarity).

**Cellular Location**

Nucleus {ECO:0000250|UniProtKB:Q60547}. Chromosome {ECO:0000250|UniProtKB:Q60547}. Chromosome, centromere {ECO:0000250|UniProtKB:Q60547}. Note=It is present in early unpaired cores, in the lateral domains of the synaptonemal complex and in the chromosome cores when they separate at diplotene. It is found axial to the metaphase I chromosomes and in association with pairs of sister centromeres. The centromere-associated protein becomes dissociated from the centromeres at anaphase II and is not found in mitotic metaphase centromeres. {ECO:0000250|UniProtKB:Q60547}

**Tissue Location**

Testis-specific.

**SYCP3 Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.
