VSV-g Tag Antibody
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP1016a

Specification

VSV-g Tag Antibody - Product Information

Application	**WB,E**
Host	**Rabbit**
Clonality	**Polyclonal**
Isotype	**Rabbit IgG**

VSV-g Tag Antibody - Additional Information

Target/Specificity
KLH conjugated synthetic peptide encoding VSV-g tag (CYTDIEMNRLGK) was used as antigen.

Dilution
WB~~1:1000

Format
Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

Storage
Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions
VSV-g Tag Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

VSV-g Tag Antibody - Protein Information

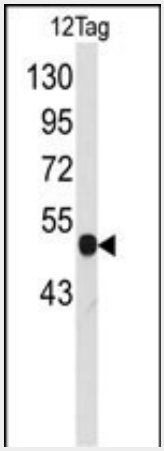

VSV-g Tag Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

Western blot analysis of anti-Tag-VSV-G Pab (Cat. #AP1016a) in 12tag cell line lysates (35ug/lane). Tag-VSV-G(arrow) was detected using the purified Pab.

VSV-g Tag Antibody - Background

Epitope tags consisting of short sequences recognized by well-characterizated antibodies have been widely used in the study of protein expression in various systems. VSV-g is an epitope tag composed of an 11 residue peptide, YTDIEMNRLGK, derived from the Vesicular Stomatitis viral glycoprotein. Abgent's anti-VSV-g polyclonal antibody provides a simple solution to detect the expression of a VSV-g-tagged protein in cells.
