

PALB2 Antibody (Center)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP11688c

Specification

PALB2 Antibody (Center) - Product Information

Application WB, FC, E **Primary Accession** 086YC2 Other Accession NP 078951.2 Reactivity Human Host **Rabbit** Clonality **Polyclonal** Isotype Rabbit IgG Calculated MW 131295 Antigen Region 546-574

PALB2 Antibody (Center) - Additional Information

Gene ID 79728

Other Names

Partner and localizer of BRCA2, PALB2, FANCN

Target/Specificity

This PALB2 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 546-574 amino acids from the Central region of human PALB2.

Dilution

WB~~1:1000 FC~~1:10~50

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

PALB2 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

PALB2 Antibody (Center) - Protein Information

Name PALB2

Synonyms FANCN

Function Plays a critical role in homologous recombination repair (HRR) through its ability to recruit BRCA2 and RAD51 to DNA breaks (PubMed:16793542, PubMed:19423707, PubMed:19369211, PubMed:22941656, PubMed:24141787, PubMed:28319063). Strongly stimulates the DNA strand- invasion activity of RAD51, stabilizes the nucleoprotein filament against a disruptive BRC3-BRC4 polypeptide and helps RAD51 to overcome the suppressive effect of replication protein A (RPA) (PubMed: 20871615). Functionally cooperates with RAD51AP1 in promoting of D-loop formation by RAD51 (PubMed: 20871616). Serves as the molecular scaffold in the formation of the BRCA1-PALB2-BRCA2 complex which is essential for homologous recombination (PubMed:19369211). Via its WD repeats is proposed to scaffold a HR complex containing RAD51C and BRCA2 which is thought to play a role in HR-mediated DNA repair (PubMed: 24141787). Essential partner of BRCA2 that promotes the localization and stability of BRCA2 (PubMed:16793542). Also enables its recombinational repair and checkpoint functions of BRCA2 (PubMed:16793542). May act by promoting stable association of BRCA2 with nuclear structures, allowing BRCA2 to escape the effects of proteasome-mediated degradation (PubMed: 16793542). Binds DNA with high affinity for D loop, which comprises single-stranded, double-stranded and branched DNA structures (PubMed: 20871616). May play a role in the extension step after strand invasion at replication-dependent DNA double-strand breaks; together with BRCA2 is involved in both POLH localization at collapsed replication forks and DNA polymerization activity (PubMed: 24485656).

Cellular Location

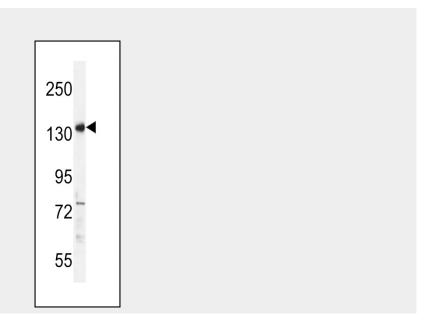

Nucleus Note=Colocalizes with BRCA2 and BRCA1 in nuclear foci

PALB2 Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

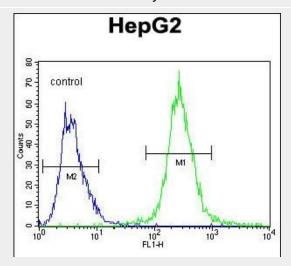

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

PALB2 Antibody (Center) - Images

PALB2 Antibody (Center) (Cat. #AP11688c) western blot analysis in HepG2 cell line lysates (35ug/lane). This demonstrates the PALB2 antibody detected the PALB2 protein (arrow).

PALB2 Antibody (Center) (Cat. #AP11688c) flow cytometric analysis of HepG2 cells (right histogram) compared to a negative control cell (left histogram).FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.

PALB2 Antibody (Center) - Background

This gene encodes a protein that may function in tumor suppression. This protein binds to and colocalizes with the breast cancer 2 early onset protein (BRCA2) in nuclear foci and likely permits the stable intranuclear localization and accumulation of BRCA2.
