Gene ID 27042

Other Names

Digestive organ expansion factor homolog, DEXF, C1orf107, DEF

Target/Specificity

This DEF antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 2-30 amino acids from the N-terminal region of human DEF.

Dilution

IF~~1:10~50
WB~~1:2000
IHC-P~~1:10~50

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

DEF Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

DEF Antibody (N-term) - Protein Information

Name UTP25 ([HGNC:28440](#))

Function Component of the ribosomal small subunit processome for the biogenesis of ribosomes, functions in pre-ribosomal RNA (pre-rRNA) processing (By similarity). Essential for embryonic development in part through the regulation of p53 pathway. Controls the expansion growth of digestive organs and liver (PubMed:[25007945](#), PubMed:[27657329](#), PubMed:[23357851](#)). Also involved in the sympathetic neuronal development (By similarity). Mediates, with CAPN3, the proteasome-independent degradation of p53/TP53 (PubMed:[23357851](#), PubMed:[27657329](#)).

Cellular Location

Nucleus, nucleolus

Tissue Location

Expressed in colon..

DEF Antibody (N-term) (Cat. #AP11810a) immunohistochemistry analysis in formalin fixed and paraffin embedded human hepatocarcinoma followed by peroxidase conjugation of the secondary antibody and DAB staining. This data demonstrates the use of DEF Antibody (N-term) for immunohistochemistry. Clinical relevance has not been evaluated.

Overlay histogram showing U-2OS cells stained with AP11810a (green line). The cells were fixed with 2% paraformaldehyde (10 min) and then permeabilized with 90% methanol for 10 min. The cells were then incubated in 2% bovine serum albumin to block non-specific protein-protein interactions followed by the antibody (AP11810a, 1:25 dilution) for 60 min at 37°C. The secondary antibody used was Goat-Anti-Rabbit IgG, DyLight® 488 Conjugated Highly Cross-Adsorbed (OH191631) at 1/200 dilution for 40 min at 37°C. Isotype control antibody (blue line) was rabbit IgG (1 µg/1x10⁶ cells) used under the same conditions. Acquisition of >10,000 events was performed.
