RGS7 Antibody (C-term)

Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP12015b

Specification

RGS7 Antibody (C-term) - Product Information

Application	**WB, IHC-P,E**
Primary Accession	P49802
Other Accession	NP_002915.3
Reactivity	**Human**
Host	**Rabbit**
Clonality	**Polyclonal**
Isotype	**Rabbit IgG**
Calculated MW	**57668**
Antigen Region	**440-469**

RGS7 Antibody (C-term) - Additional Information

Gene ID 6000

Other Names
Regulator of G-protein signaling 7, RGS7, RGS7

Target/Specificity
This RGS7 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 440-469 amino acids from the C-terminal region of human RGS7.

Dilution
WB~~1:1000
IHC-P~~1:10~50

Format
Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage
Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions
RGS7 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

RGS7 Antibody (C-term) - Protein Information

Name RGS7

Function GTPase activator component of the RGS7-GNB5 complex that regulates G

protein-coupled receptor signaling cascades (PubMed:10521509, PubMed:10862767, PubMed:31189666). The RGS7-GNB5 complex acts as an inhibitor signal transduction by promoting the GTPase activity of G protein alpha subunits, such as GNAO1, thereby driving them into their inactive GDP-bound form (PubMed:10521509, PubMed:10862767). May play a role in synaptic vesicle exocytosis (PubMed:12659861) (Probable). Glycine-dependent regulation of the RGS7- GNB5 complex by GPR158 affects mood and cognition via its ability to regulate neuronal excitability in L2/L3 pyramidal neurons of the prefrontal cortex (By similarity). Modulates the activity of potassium channels that are activated by GNAO1 in response to muscarinic acetylcholine receptor M2/CHRM2 signaling (PubMed:15897264).

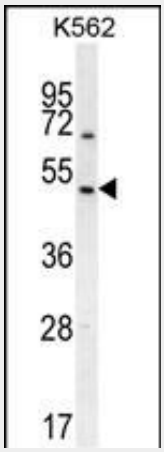

Cellular Location
Cytoplasm, cytosol. Cytoplasm Cell membrane. Membrane; Peripheral membrane protein; Cytoplasmic side. Note=Interaction with PKD1 promotes location at the cell membrane (PubMed:10339594). Interaction with RGS7BP promotes location at the cell membrane (PubMed:15897264)

RGS7 Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

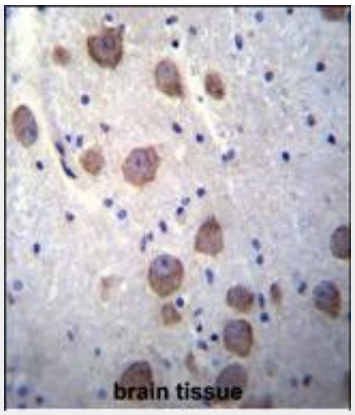

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

RGS7 Antibody (C-term) - Images

RGS7 Antibody (C-term) (Cat. #AP12015b) western blot analysis in K562 cell line lysates (35ug/lane).This demonstrates the RGS7 antibody detected the RGS7 protein (arrow).

RGS7 Antibody (C-term) (Cat. #AP12015b)immunohistochemistry analysis in formalin fixed and paraffin embedded human brain tissue followed by peroxidase conjugation of the secondary antibody and DAB staining.This data demonstrates the use of RGS7 Antibody (C-term) for immunohistochemistry. Clinical relevance has not been evaluated.

RGS7 Antibody (C-term) - Background

RGS7 inhibits signal transduction by increasing the GTPase activity of G protein alpha subunits thereby driving them into their inactive GDP-bound form. Activity on G(o)-alpha is specifically enhanced by the RGS6/GNG5 dimer. May play a role in synaptic vesicle exocytosis. May play important role in the rapid regulation of neuronal excitability and the cellular responses to short-lived stimulations (By similarity).
