PAGE5 Antibody (C-term) - Images

PAGE5 Antibody (C-term) (Cat. #AP12792b) western blot analysis in NCI-H292 cell line lysates (35ug/lane). This demonstrates the PAGE5 antibody detected the PAGE5 protein (arrow).

PAGE5 Antibody (C-term) (Cat. #AP12792b) immunohistochemistry analysis in formalin fixed and paraffin embedded human liver tissue followed by peroxidase conjugation of the secondary

antibody and DAB staining. This data demonstrates the use of PAGE5 Antibody (C-term) for immunohistochemistry. Clinical relevance has not been evaluated.

PAGE5 Antibody (C-term) - Background

This gene is a member of the GAGE family, which is expressed in a variety of tumors and in some fetal and reproductive tissues. The protein encoded by this gene shares a sequence similarity with other GAGE/PAGE proteins. It may also belong to a family of CT (cancer-testis) antigens. Multiple alternatively spliced transcript variants encoding distinct isoforms have been found for this gene, but the biological validity of some variants have not been determined.
