

RM50 Antibody (C-term)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP12930B

Specification

RM50 Antibody (C-term) - Product Information

Application WB, IHC-P,E **Primary Accession 08N5N7** Other Accession NP 061924.1 Reactivity Human Host **Rabbit** Clonality **Polyclonal** Isotype Rabbit IgG Calculated MW 18325 Antigen Region 119-147

RM50 Antibody (C-term) - Additional Information

Gene ID 54534

Other Names

39S ribosomal protein L50, mitochondrial, L50mt, MRP-L50, MRPL50

Target/Specificity

This RM50 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 119-147 amino acids from the C-terminal region of human RM50.

Dilution

WB~~1:1000 IHC-P~~1:10~50

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

RM50 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

RM50 Antibody (C-term) - Protein Information

Name MRPL50

Cellular Location

Mitochondrion

RM50 Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- <u>Immunofluorescence</u>
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

RM50 Antibody (C-term) - Images

RM50 Antibody (C-term) (Cat. #AP12930b) western blot analysis in MDA-MB435 cell line lysates (35ug/lane). This demonstrates the RM50 antibody detected the RM50 protein (arrow).

RM50 Antibody (C-term) (Cat. #AP12930b)immunohistochemistry analysis in formalin fixed and paraffin embedded human brain tissue followed by peroxidase conjugation of the secondary antibody and DAB staining. This data demonstrates the use of RM50 Antibody (C-term) for immunohistochemistry. Clinical relevance has not been evaluated.

RM50 Antibody (C-term) - Background

Mammalian mitochondrial ribosomal proteins are encoded by nuclear genes and help in protein synthesis within the mitochondrion. Mitochondrial ribosomes (mitoribosomes) consist of a small 28S subunit and a large 39S subunit. They have an estimated 75% protein to rRNA composition compared to prokaryotic ribosomes, where this ratio is reversed. Another difference between mammalian mitoribosomes and prokaryotic ribosomes is that the latter contain a 5S rRNA. Among different species, the proteins comprising the mitoribosome differ greatly in sequence, and sometimes in biochemical properties, which prevents easy recognition by sequence homology. This gene encodes a putative 39S subunit protein and belongs to the L47P ribosomal protein family. Pseudogenes corresponding to this gene are found on chromosomes 2p, 2q, 5p, and 10q.
