

## **HIST1H1D Antibody (Center)**

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP13745c

## **Specification**

# **HIST1H1D Antibody (Center) - Product Information**

WB, IHC-P,E Application **Primary Accession** P16402 Other Accession NP 005311.1 Reactivity Human Host **Rabbit** Clonality **Polyclonal** Isotype Rabbit IgG Calculated MW 22350 Antigen Region 135-164

## **HIST1H1D Antibody (Center) - Additional Information**

#### **Gene ID 3007**

#### **Other Names**

Histone H13, Histone H1c, Histone H1s-2, HIST1H1D, H1F3

#### Target/Specificity

This HIST1H1D antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 135-164 amino acids from the Central region of human HIST1H1D.

# **Dilution**

WB~~1:1000 IHC-P~~1:10~50

### **Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

### Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

## **Precautions**

HIST1H1D Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

## **HIST1H1D Antibody (Center) - Protein Information**

## Name H1-3 (HGNC:4717)

Function Histone H1 protein binds to linker DNA between nucleosomes forming the

Tel: 858.875.1900 Fax: 858.875.1999

macromolecular structure known as the chromatin fiber. Histones H1 are necessary for the condensation of nucleosome chains into higher-order structured fibers. Acts also as a regulator of individual gene transcription through chromatin remodeling, nucleosome spacing and DNA methylation (By similarity).

#### **Cellular Location**

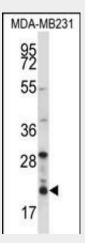

Nucleus. Chromosome. Note=According to PubMed:15911621 more commonly found in euchromatin. According to PubMed:10997781 is associated with inactive chromatin

## **HIST1H1D Antibody (Center) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

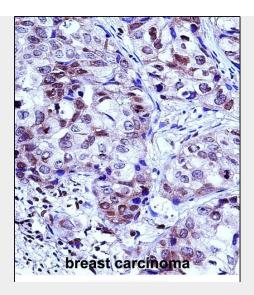

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

## **HIST1H1D Antibody (Center) - Images**

HIST1H1D Antibody (Center) (Cat. #AP13745c) western blot analysis in MDA-MB231 cell line lysates (35ug/lane). This demonstrates the HIST1H1D antibody detected the HIST1H1D protein (arrow).

HIST1H1D Antibody (Center) (Cat. #AP13745c)immunohistochemistry analysis in formalin fixed and paraffin embedded human breast carcinoma followed by peroxidase conjugation of the secondary antibody and DAB staining. This data demonstrates the use of HIST1H1D Antibody (Center) for immunohistochemistry. Clinical relevance has not been evaluated.

## HIST1H1D Antibody (Center) - Background

Histones are basic nuclear proteins responsible for nucleosome structure of the chromosomal fiber in eukaryotes. Two molecules of each of the four core histones (H2A, H2B, H3, and H4) form an octamer, around which approximately 146 bp of DNA is wrapped in repeating units, called nucleosomes. The linker histone, H1, interacts with linker DNA between nucleosomes and functions in the compaction of chromatin into higher order structures. This gene is intronless and encodes a member of the histone H1 family. Transcripts from this gene lack polyA tails but instead contain a palindromic termination element. This gene is found in the large histone gene cluster on chromosome 6.
