**DLX4 Antibody (Center) - Images**

DLX4 Antibody (Center) (Cat. #AP14046c) western blot analysis in K562 cell line lysates (35ug/lane). This demonstrates the DLX4 antibody detected the DLX4 protein (arrow).

Western blot analysis of DLX4 (arrow) using rabbit polyclonal DLX4 Antibody (Center) (Cat. #AP14046c). 293 cell lysates (2 ug/lane) either nontransfected (Lane 1) or transiently transfected (Lane 2) with the DLX4 gene.

#### **DLX4 Antibody (Center) - Background**

Many vertebrate homeo box-containing genes have been identified on the basis of their sequence similarity with *Drosophila* developmental genes. Members of the *Dlx* gene family contain a homeobox that is related to that of *Distal-less* (*Dll*), a gene expressed in the head and limbs of the developing fruit fly. The *Distal-less* (*Dlx*) family of genes comprises at least 6 different members, *DLX1-DLX6*. The *DLX* proteins are postulated to play a role in forebrain and craniofacial development. Three transcript variants have been described for this gene, however, the full length nature of one variant has not been described. Studies of the two splice variants revealed that one encoded isoform functions as a repressor of the beta-globin gene while the other isoform lacks that function.
