

#### SEC23IP Antibody (C-term)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP14511b

#### Specification

# SEC23IP Antibody (C-term) - Product Information

Application Primary Accession Other Accession Reactivity Host Clonality Isotype Antigen Region WB,E <u>O9Y6Y8</u> <u>NP\_009121.1</u> Human Rabbit Polyclonal Rabbit IgG 724-752

#### SEC23IP Antibody (C-term) - Additional Information

Gene ID 11196

**Other Names** SEC23-interacting protein, p125, SEC23IP

Target/Specificity

This SEC23IP antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 724-752 amino acids from the C-terminal region of human SEC23IP.

Dilution WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

SEC23IP Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

## SEC23IP Antibody (C-term) - Protein Information

Name SEC23IP

**Function** Plays a role in the organization of endoplasmic reticulum exit sites. Specifically binds to phosphatidylinositol 3-phosphate (PI(3)P), phosphatidylinositol 4-phosphate (PI(4)P) and phosphatidylinositol 5-phosphate (PI(5)P).

**Cellular Location** 

Cytoplasmic vesicle, COPII-coated vesicle membrane; Peripheral membrane protein; Cytoplasmic side. Endoplasmic reticulum

Tissue Location

Ubiquitously expressed with stronger levels detected in heart, liver and skeletal muscle

#### SEC23IP Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

## SEC23IP Antibody (C-term) - Images

SEC23IP Antibody (C-term) (Cat. #AP14511b) western blot analysis in A549 cell line lysates (35ug/lane).This demonstrates the SEC23IP antibody detected the SEC23IP protein (arrow).

## SEC23IP Antibody (C-term) - Background

COPII-coated vesicles are involved in protein transport from the endoplasmic reticulum to the Golgi apparatus. The protein encoded by this gene was identified by its interaction with a mouse protein similar to yeast Sec23p, an essential component of the COPII. This protein shares significant similarity with phospholipid-modifying proteins, especially phosphatidic acid preferring-phospholipase A1. Overexpression of this protein has been shown to cause disorganization of the endoplasmic reticulum-Golgi intermediate compartment and Golgi apparatus, which suggests its role in the early secretory pathway. [provided by RefSeq].
