Syndecan-3, SYND3, SDC3, KIAA0468

Target/Specificity

This SDC3 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 413-442 amino acids from the C-terminal region of human SDC3.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

SDC3 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

SDC3 Antibody (C-term) - Protein Information**Name** SDC3**Synonyms** KIAA0468

Function Cell surface proteoglycan that may bear heparan sulfate (By similarity). May have a role in the organization of cell shape by affecting the actin cytoskeleton, possibly by transferring signals from the cell surface in a sugar-dependent mechanism.

Cellular Location

Cell membrane; Single-pass type I membrane protein

Tissue Location

Expressed in the nervous system, the adrenal gland, and the spleen.

SDC3 Antibody (C-term) - Background

The protein encoded by this gene belongs to the syndecan proteoglycan family. It may play a role in the organization of cell shape by affecting the actin cytoskeleton, possibly by transferring signals from the cell surface in a sugar-dependent mechanism. Allelic variants of this gene have been associated with obesity.
