

CPT1C Antibody (C-term)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP16195b

Specification

CPT1C Antibody (C-term) - Product Information

Application	WB,E
Primary Accession	Q8TCG5
Other Accession	NP_001129524.1 , NP_689572.1
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	90989
Antigen Region	596-625

CPT1C Antibody (C-term) - Additional Information

Gene ID 126129

Other Names

Carnitine O-palmitoyltransferase 1, brain isoform, CPT1-B, CPT IC, Carnitine O-palmitoyltransferase I, brain isoform, CPTI-B, Carnitine palmitoyltransferase 1C, CPT1C, CATL1

Target/Specificity

This CPT1C antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 596-625 amino acids from the C-terminal region of human CPT1C.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

CPT1C Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

CPT1C Antibody (C-term) - Protein Information

Name CPT1C ([HGNC:18540](#))

Synonyms CATL1

Function Palmitoyl thioesterase specifically expressed in the endoplasmic reticulum of neurons. Modulates the trafficking of the glutamate receptor, AMPAR, to plasma membrane through depalmitoylation of GRIA1 (PubMed:[30135643](#)). Also regulates AMPAR trafficking through the regulation of SACM1L phosphatidylinositol-3-phosphatase activity by interaction in a malonyl-CoA dependent manner (By similarity). Binds malonyl-CoA and couples malonyl-CoA to ceramide levels, necessary for proper spine maturation and contributing to systemic energy homeostasis and appetite control (PubMed:[16651524](#)). Binds to palmitoyl-CoA, but does not have carnitine palmitoyltransferase 1 catalytic activity or at very low levels (PubMed:[25751282](#), PubMed:[30135643](#)).

Cellular Location

Cell projection, dendrite. Cell projection, axon. Endoplasmic reticulum membrane; Multi-pass membrane protein. Note=Localized in the soma and dendritic and axonal projections.

Tissue Location

Expressed predominantly in brain and testis. Expressed in motor neurons.

CPT1C Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

CPT1C Antibody (C-term) - Images

CPT1C Antibody (C-term) (Cat. #AP16195b) western blot analysis in HL-60 cell line lysates (35ug/lane). This demonstrates the CPT1C antibody detected the CPT1C protein (arrow).

CPT1C Antibody (C-term) - Background

The Cpt1 family of proteins are outer mitochondrial membrane proteins that regulate the entry into, and oxidation of fatty acids by, mitochondria. Malonyl-CoA, an intermediate in fatty acid synthesis, has been implicated as a regulatory component of the energy sensing system that feeds into hypothalamic neurons to impart energy homeostasis. Malonyl-CoA levels in the hypothalamus are dynamically regulated by fasting and feeding, altering subsequent feeding behaviour. Cpt1c, the brain-specific carnitine O-palmitoyltransferase 1, is thought to relay information about malonyl-CoA levels in hypothalamic neurons that express orexigenic and anorexigenic neuropeptides that regulate food intake and peripheral energy expenditure. Unlike other Cpt1 proteins, Cpt1c binds Malonyl-CoA but does not catalyse the transfer of the malonyl group from CoA to carnitine.
