

OR4K13 Antibody (N-term)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP16236a**Specification**

OR4K13 Antibody (N-term) - Product Information

Application	WB,E
Primary Accession	Q8NH42
Other Accession	NP_001004714.1
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	34261
Antigen Region	65-93

OR4K13 Antibody (N-term) - Additional Information**Gene ID** 390433**Other Names**

Olfactory receptor 4K13, Olfactory receptor OR14-27, OR4K13

Target/Specificity

This OR4K13 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 65-93 amino acids from the N-terminal region of human OR4K13.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

OR4K13 Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

OR4K13 Antibody (N-term) - Protein Information**Name** OR4K13**Function** Odorant receptor.

Cellular Location

Cell membrane; Multi-pass membrane protein.

OR4K13 Antibody (N-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

OR4K13 Antibody (N-term) - Images

OR4K13 Antibody (N-term) (Cat. #AP16236a) western blot analysis in human placenta tissue lysates (35ug/lane). This demonstrates the OR4K13 antibody detected the OR4K13 protein (arrow).

OR4K13 Antibody (N-term) - Background

Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organism is independent of other organisms.
