

EXT1 Antibody (Center)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP16833c**Specification**

EXT1 Antibody (Center) - Product Information

Application	WB,E
Primary Accession	Q16394
Other Accession	P97464 , Q9JK82 , A5D7I4 , NP_000118.2
Reactivity	Human
Predicted	Bovine, Hamster, Mouse
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	86255
Antigen Region	298-326

EXT1 Antibody (Center) - Additional Information**Gene ID** 2131**Other Names**

Exostosin-1, Glucuronosyl-N-acetylglucosaminyl-proteoglycan/N-acetylglucosaminyl-proteoglycan 4-alpha-N-acetylglucosaminyltransferase, Multiple exostoses protein 1, Putative tumor suppressor protein EXT1, EXT1

Target/Specificity

This EXT1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 298-326 amino acids from the Central region of human EXT1.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

EXT1 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

EXT1 Antibody (Center) - Protein Information**Name** EXT1 ([HGNC:3512](#))

Function Glycosyltransferase forming with EXT2 the heterodimeric heparan sulfate polymerase which catalyzes the elongation of the heparan sulfate glycan backbone (PubMed:[9620772](#), PubMed:[10639137](#), PubMed:[22660413](#), PubMed:[36402845](#), PubMed:[36593275](#)). Glycan backbone extension consists in the alternating transfer of (1->4)-beta-D-GlcA and (1->4)-alpha-D-GlcNAc residues from their respective UDP-sugar donors. Both EXT1 and EXT2 are required for the full activity of the polymerase since EXT1 bears the N-acetylglucosaminyl-proteoglycan 4-beta-glucuronosyltransferase activity within the complex while EXT2 carries the glucuronosyl-N-acetylglucosaminyl-proteoglycan 4-alpha-N- acetylglucosaminyltransferase activity (PubMed:[36402845](#), PubMed:[36593275](#)). Heparan sulfate proteoglycans are ubiquitous components of the extracellular matrix and play an important role in tissue homeostasis and signaling (PubMed:[9620772](#), PubMed:[10639137](#), PubMed:[22660413](#), PubMed:[11391482](#)).

Cellular Location

Golgi apparatus membrane; Single-pass type II membrane protein. Golgi apparatus, cis-Golgi network membrane; Single-pass type II membrane protein. Endoplasmic reticulum membrane; Single-pass type II membrane protein. Note=The active heparan sulfate polymerase complex composed of EXT1 and EXT2 is localized to the Golgi apparatus. If both proteins are individually detected in the endoplasmic reticulum, the formation of the complex promotes their transport to the Golgi.

Tissue Location

Widely expressed..

EXT1 Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

EXT1 Antibody (Center) - Images

EXT1 Antibody (Center) (Cat. #AP16833c) western blot analysis in K562 cell line lysates (35ug/lane). This demonstrates the EXT1 antibody detected the EXT1 protein (arrow).

EXT1 Antibody (Center) - Background

This gene encodes an endoplasmic reticulum-resident type II transmembrane glycosyltransferase involved in the chain elongation step of heparan sulfate biosynthesis. Mutations in this gene cause the type I form of multiple exostoses. [provided by RefSeq].
