**PFDN1 Antibody (C-term) - Additional Information**

**Gene ID** 5201

**Other Names**

Prefoldin subunit 1, PFDN1, PFD1

**Target/Specificity**

This PFDN1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 86-113 amino acids from the C-terminal region of human PFDN1.

**Dilution**

WB~~1:1000

**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

PFDN1 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

**PFDN1 Antibody (C-term) - Protein Information**

**Name** PFDN1

**Synonyms** PFD1

**Function** Binds specifically to cytosolic chaperonin (c-CPN) and transfers target proteins to it. Binds to nascent polypeptide chain and promotes folding in an environment in which there are many competing pathways for nonnative proteins.

### **PFDN1 Antibody (C-term) - Background**

This gene encodes a member of the prefoldin beta subunit family. The encoded protein is one of six subunits of prefoldin, a molecular chaperone complex that binds and stabilizes newly synthesized polypeptides, thereby allowing them to fold correctly. The complex, consisting of two alpha and four beta subunits, forms a double beta barrel assembly with six protruding coiled-coils.
