

AKAP8L Antibody (C-term)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP17416B

Specification

AKAP8L Antibody (C-term) - Product Information

Application WB,E
Primary Accession Q9ULX6

Other Accession

Reactivity

OgroL7, NP_055186.2

Human, Mouse

Host Rabbit
Clonality Polyclonal
Isotype Rabbit IgG
Calculated MW 71640
Antigen Region 485-512

AKAP8L Antibody (C-term) - Additional Information

Gene ID 26993

Other Names

A-kinase anchor protein 8-like, AKAP8-like protein, Helicase A-binding protein 95, HAP95, Homologous to AKAP95 protein, HA95, Neighbor of A-kinase-anchoring protein 95, Neighbor of AKAP95, AKAP8L, NAKAP, NAKAP95

Target/Specificity

This AKAP8L antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 485-512 amino acids from the C-terminal region of human AKAP8L.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

AKAP8L Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

AKAP8L Antibody (C-term) - Protein Information

Name AKAP8L

Synonyms NAKAP, NAKAP95

Function Could play a role in constitutive transport element (CTE)- mediated gene expression by association with DHX9. Increases CTE- dependent nuclear unspliced mRNA export (PubMed:10748171, PubMed:11402034). Proposed to target PRKACA to the nucleus but does not seem to be implicated in the binding of regulatory subunit II of PKA (PubMed:10761695, PubMed:11884601). May be involved in nuclear envelope breakdown and chromatin condensation. May be involved in anchoring nuclear membranes to chromatin in interphase and in releasing membranes from chromating at mitosis (PubMed:11034899). May regulate the initiation phase of DNA replication when associated with TMPO isoform Beta (PubMed:12538639). Required for cell cycle G2/M transition and histone deacetylation during mitosis. In mitotic cells recruits HDAC3 to the vicinity of chromatin leading to deacetylation and subsequent phosphorylation at 'Ser-10' of histone H3; in this function seems to act redundantly with AKAP8 (PubMed:16980585). May be involved in regulation of pre-mRNA splicing (PubMed:17594903).

Cellular Location

Nucleus. Nucleus matrix. Nucleus speckle. Nucleus, PML body. Cytoplasm Note=Colocalizes with PRPF40A in the nuclear matrix (PubMed:16391387) Nuclear at steady state but shuttles between the nucleus and cytoplasm (PubMed:10748171). The shuttling property has been questioned (PubMed:11034899). Colocalizes with EBNA-LP in PML bodies (PubMed:11884601).

Tissue Location

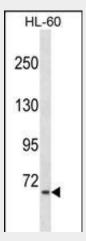

Ubiquitously expressed. Expressed in the brain cortex (at protein level).

AKAP8L Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture
