

AFF2 Antibody (Center)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP18150c

Specification

AFF2 Antibody (Center) - Product Information

Application Primary Accession Other Accession Reactivity Host Clonality Isotype Calculated MW Antigen Region WB,E <u>P51816</u> <u>NP_001162593.1</u> Human Rabbit Polyclonal Rabbit IgG 144771 886-912

AFF2 Antibody (Center) - Additional Information

Gene ID 2334

Other Names

AF4/FMR2 family member 2, Fragile X E mental retardation syndrome protein, Fragile X mental retardation 2 protein, FMR2P, Protein FMR-2, Protein Ox19, AFF2, FMR2, OX19

Target/Specificity

This AFF2 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 886-912 amino acids from the Central region of human AFF2.

Dilution WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

AFF2 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

AFF2 Antibody (Center) - Protein Information

Name AFF2 (<u>HGNC:3776</u>)

Synonyms FMR2, OX19

Function RNA-binding protein. Might be involved in alternative splicing regulation through an interaction with G-quartet RNA structure.

Cellular Location

Nucleus speckle. Note=When splicing is inhibited, accumulates in enlarged speckles

Tissue Location

Brain (most abundant in hippocampus and amygdala), placenta and lung

AFF2 Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- <u>Dot Blot</u>
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

AFF2 Antibody (Center) - Images

AFF2 Antibody (Center) (Cat. #AP18150c) western blot analysis in 293 cell line lysates (35ug/lane). This demonstrates the AFF2 antibody detected the AFF2 protein (arrow).

AFF2 Antibody (Center) - Background

This gene encodes a putative transcriptional activator that is a member of the AF4FMR2 gene family. This gene is associated with the folate-sensitive fragile X E locus on chromosome X. A repeat polymorphism in the fragile X E locus results in silencing of this gene causing Fragile X E syndrome. Fragile X E syndrome is a form of nonsyndromic X-linked mental retardation. Alternate splicing results in multiple transcript variants.
