

FBXL19 Antibody (C-term)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP18447b**Specification**

FBXL19 Antibody (C-term) - Product Information

Application	WB,E
Primary Accession	Q6PCT2
Other Accession	Q6PB97 , NP_001093254.2
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Antigen Region	543-570

FBXL19 Antibody (C-term) - Additional Information**Gene ID** 54620**Other Names**

F-box/LRR-repeat protein 19, F-box and leucine-rich repeat protein 19, FBXL19, FBL19

Target/Specificity

This FBXL19 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 543-570 amino acids from the C-terminal region of human FBXL19.

Dilution

WB~~1:2000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

FBXL19 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

FBXL19 Antibody (C-term) - Protein Information**Name** FBXL19**Synonyms** FBL19**Function** Substrate-recognition component of the SCF (SKP1-CUL1-F-box protein)-type E3

ubiquitin ligase complex that plays a role in different processes including cell migration, cell proliferation or cytoskeletal reorganization (PubMed:[24684802](#), PubMed:[29522376](#)). Mediates RHOA ubiquitination and degradation in a ERK2-dependent manner (PubMed:[23871831](#)). Induces RAC1 and RAC3 degradation by the proteasome system and thereby regulates TGF β 1-induced E-cadherin down-regulation and cell migration (PubMed:[24684802](#), PubMed:[23512198](#)). Mediates also ubiquitination and degradation of IL-33-induced receptor IL1RL1 and subsequently blocks IL-33-mediated apoptosis (By similarity). Within the nucleus, binds to DNA containing unmethylated cytidine-phosphate- guanosine (CpG) dinucleotides (PubMed:[29276034](#)). Recruits CDK-mediator to chromatin and targets CDK8 to promoters of silent developmental genes leading to induction of these genes during cell differentiation. In addition, plays a critical role in the recruitment of RNF20 to histone H2B leading to H2B mono-ubiquitination (By similarity).

Cellular Location

Cytoplasm. Nucleus

FBXL19 Antibody (C-term) - Images

Anti-FBXL19 Antibody (C-term) at 1:2000 dilution + A549 whole cell lysate Lysates/proteins at 20 μ g per lane. Secondary Goat Anti-Rabbit IgG, (H+L), Peroxidase conjugated at 1/10000 dilution. Predicted band size : 76 kDa Blocking/Dilution buffer: 5% NFDm/TBST.

FBXL19 Antibody (C-term) - Background

Members of the F-box protein family, such as FBXL19, are

characterized by an approximately 40-amino acid F-box motif. SCF complexes, formed by SKP1 (MIM 601434), cullin (see CUL1; MIM 603134), and F-box proteins, act as protein-ubiquitin ligases. F-box proteins interact with SKP1 through the F box, and they interact with ubiquitination targets through other protein interaction domains (Jin et al., 2004 [PubMed 15520277]).[supplied by OMIM].
