

SURF6 Antibody (Center)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP19078c**Specification**

SURF6 Antibody (Center) - Product Information

Application	WB,E
Primary Accession	O75683
Other Accession	NP_006744.2
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	41450
Antigen Region	187-213

SURF6 Antibody (Center) - Additional Information**Gene ID** 6838**Other Names**

Surfeit locus protein 6, SURF6, SURF-6

Target/Specificity

This SURF6 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 187-213 amino acids from the Central region of human SURF6.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

SURF6 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

SURF6 Antibody (Center) - Protein Information**Name** SURF6**Synonyms** SURF-6

Function Binds to both DNA and RNA in vitro, with a stronger binding capacity for RNA. May represent a nucleolar constitutive protein involved in ribosomal biosynthesis or assembly (By similarity).

Cellular Location

Nucleus, nucleoplasm. Nucleus, nucleolus. Note=Granular component of the nucleolus

SURF6 Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

SURF6 Antibody (Center) - Images

SURF6 Antibody (Center) (Cat. #AP19078c) western blot analysis in A549 cell line lysates (35ug/lane). This demonstrates the SURF6 antibody detected the SURF6 protein (arrow).

SURF6 Antibody (Center) - Background

This gene is located in the surfait gene cluster, a group of very tightly linked genes that do not share sequence similarity. The gene demonstrates features of a housekeeping gene, being ubiquitously expressed, and the encoded protein has been localized to the nucleolus. The protein includes motifs found in both the mouse and fish orthologs, which suggests a putative function as a nucleolar-matrix protein with nucleic acid-binding properties, based on characteristics determined in mouse.
