

TMPO Antibody (Center)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP19087C

Specification

TMPO Antibody (Center) - Product Information

Application WB,E
Primary Accession P42167

Other Accession NP 001027454.1

Reactivity
Human
Host
Clonality
Polyclonal
Isotype
Calculated MW
Antigen Region

Human
Rabbit
Rabbit
Solo70
243-269

TMPO Antibody (Center) - Additional Information

Gene ID 7112

Other Names

Lamina-associated polypeptide 2, isoforms beta/gamma, Thymopoietin, isoforms beta/gamma, TP beta/gamma, Thymopoietin-related peptide isoforms beta/gamma, TPRP isoforms beta/gamma, Thymopoietin, TP, Splenin, Thymopentin, TP5, TMPO, LAP2

Target/Specificity

This TMPO antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 243-269 amino acids from the Central region of human TMPO.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

TMPO Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

TMPO Antibody (Center) - Protein Information

Name TMPO

Synonyms LAP2

Function May help direct the assembly of the nuclear lamina and thereby help maintain the structural organization of the nuclear envelope. Possible receptor for attachment of lamin filaments to the inner nuclear membrane. May be involved in the control of initiation of DNA replication through its interaction with NAKAP95.

Cellular Location

Nucleus inner membrane; Single-pass type II membrane protein. Note=Tightly associated with the nuclear lamina

Tissue Location

Expressed in many tissues. Most abundant in adult thymus and fetal liver

TMPO Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

TMPO Antibody (Center) - Images

TMPO Antibody (Center) (Cat. #AP19087c) western blot analysis in Jurkat cell line lysates (35ug/lane). This demonstrates the TMPO antibody detected the TMPO protein (arrow).

TMPO Antibody (Center) - Background

The protein encoded by this gene resides in the nucleus and may play a role in the assembly of the nuclear lamina, and thus help maintain the structural organization of the nuclear envelope. It may function as a receptor for the attachment of lamin filaments to the inner nuclear membrane. Mutations in this gene are associated with dilated cardiomyopathy. Alternatively spliced

transcript variants encoding different isoforms have been noted for this gene.
