

TNNC2 Antibody(C-term)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP19581b**Specification**

TNNC2 Antibody(C-term) - Product Information

Application	WB,E
Primary Accession	P02585
Other Accession	NP_003270.1
Reactivity	Human, Mouse
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	18122
Antigen Region	97-126

TNNC2 Antibody(C-term) - Additional Information**Gene ID** 7125**Other Names**

Troponin C, skeletal muscle, TNNC2

Target/Specificity

This TNNC2 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 97-126 amino acids from the C-terminal region of human TNNC2.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

TNNC2 Antibody(C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

TNNC2 Antibody(C-term) - Protein Information**Name** TNNC2

Function Troponin is the central regulatory protein of striated muscle contraction. Tn consists of three components: Tn-I which is the inhibitor of actomyosin ATPase, Tn-T which contains the

binding site for tropomyosin and Tn-C. The binding of calcium to Tn-C abolishes the inhibitory action of Tn on actin filaments.

TNNC2 Antibody(C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

TNNC2 Antibody(C-term) - Images

TNNC2 Antibody (C-term) (Cat. #AP19581b) western blot analysis in K562 cell line lysates (35ug/lane). This demonstrates the TNNC2 antibody detected the TNNC2 protein (arrow).

TNNC2 Antibody (C-term) (Cat. #AP19581b) western blot analysis in mouse spleen tissue lysates (35ug/lane). This demonstrates the TNNC2 antibody detected the TNNC2 protein (arrow).

TNNC2 Antibody(C-term) - Background

Troponin (Tn), a key protein complex in the regulation of striated muscle contraction, is composed of 3 subunits. The Tn-I subunit inhibits actomyosin ATPase, the Tn-T subunit binds tropomyosin and Tn-C, while the Tn-C subunit binds calcium and overcomes the inhibitory action of the troponin complex on actin filaments. The protein encoded by this gene is the Tn-C subunit.
