

NR2E1 Antibody (Center)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP19904c

Specification

NR2E1 Antibody (Center) - Product Information

Application	WB,E
Primary Accession	Q9Y466
Other Accession	P70052 , Q64104 , Q91379 , NP_003260.1
Reactivity	Human
Predicted	Chicken, Mouse, Xenopus
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	42589
Antigen Region	75-102

NR2E1 Antibody (Center) - Additional Information

Gene ID 7101

Other Names

Nuclear receptor subfamily 2 group E member 1, Nuclear receptor TLX, Protein tailless homolog, TII, hTII, NR2E1, TLX

Target/Specificity

This NR2E1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 75-102 amino acids from the Central region of human NR2E1.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

NR2E1 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

NR2E1 Antibody (Center) - Protein Information

Name NR2E1

Synonyms TLX

Function Orphan receptor that binds DNA as a monomer to hormone response elements (HRE) containing an extended core motif half-site sequence 5'-AAGGTCA-3' in which the 5' flanking nucleotides participate in determining receptor specificity (By similarity). May be required to pattern anterior brain differentiation. Involved in the regulation of retinal development and essential for vision. During retinogenesis, regulates PTEN-Cyclin D expression via binding to the promoter region of PTEN and suppressing its activity (By similarity). May be involved in retinoic acid receptor (RAR) regulation in retinal cells.

Cellular Location

Nucleus {ECO:0000255|PROSITE-ProRule:PRU00407}.

Tissue Location

Brain specific. Present in all brain sections tested, highest levels in the caudate nucleus and hippocampus, weakest levels in the thalamus.

NR2E1 Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.
