ZNF516 Antibody (Center) - Protein Information

Name ZNF516 (HGNC:28990)

Function Transcriptional regulator that binds to the promoter and activates the transcription of genes promoting brown adipose tissue (BAT) differentiation. Among brown adipose tissue-specific genes, binds the proximal region of the promoter of the UCP1 gene to activate its transcription and

thereby regulate thermogenesis (By similarity). May also play a role in the cellular response to replication stress (PubMed:23446422).

Cellular Location

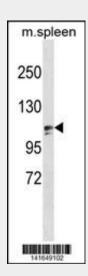

Nucleus {ECO:0000250|UniProtKB:Q7TSH3}.
