

NMNAT1 Antibody (C-Term)
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP21921b**Specification**

NMNAT1 Antibody (C-Term) - Product Information

Application	WB,E
Primary Accession	Q9HAN9
Other Accession	Q0VD50
Reactivity	Human
Predicted	Bovine
Host	Rabbit
Clonality	polyclonal
Isotype	Rabbit IgG
Calculated MW	31932

NMNAT1 Antibody (C-Term) - Additional Information**Gene ID** 64802**Other Names**

Nicotinamide mononucleotide adenylyltransferase 1, NMN adenylyltransferase 1, 2.7.7.1, Nicotinate-nucleotide adenylyltransferase 1, NaMN adenylyltransferase 1, 2.7.7.18, NMNAT1, NMNAT

Target/Specificity

This NMNAT1 antibody is generated from a rabbit immunized with a KLH conjugated synthetic peptide between 171-201 amino acids from human NMNAT1.

Dilution

WB~~1:1000

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

NMNAT1 Antibody (C-Term) is for research use only and not for use in diagnostic or therapeutic procedures.

NMNAT1 Antibody (C-Term) - Protein Information**Name** NMNAT1 ([HGNC:17877](#))

Synonyms NMNAT

Function Catalyzes the formation of NAD(+) from nicotinamide mononucleotide (NMN) and ATP (PubMed:[17402747](#)). Can also use the deamidated form; nicotinic acid mononucleotide (NaMN) as substrate with the same efficiency (PubMed:[17402747](#)). Can use triazofurin monophosphate (TrMP) as substrate (PubMed:[17402747](#)). Also catalyzes the reverse reaction, i.e. the pyrophosphorolytic cleavage of NAD(+) (PubMed:[17402747](#)). For the pyrophosphorolytic activity, prefers NAD(+) and NaAD as substrates and degrades NADH, nicotinic acid adenine dinucleotide phosphate (NADP) and nicotinamide guanine dinucleotide (NGD) less effectively (PubMed:[17402747](#)). Involved in the synthesis of ATP in the nucleus, together with PARP1, PARG and NUDT5 (PubMed:[27257257](#)). Nuclear ATP generation is required for extensive chromatin remodeling events that are energy-consuming (PubMed:[27257257](#)). Also acts as a cofactor for glutamate and aspartate ADP-ribosylation by directing PARP1 catalytic activity to glutamate and aspartate residues on histones (By similarity). Fails to cleave phosphorylated dinucleotides NADP(+), NADPH and NaADP(+) (PubMed:[17402747](#)). Protects against axonal degeneration following mechanical or toxic insults (By similarity).

Cellular Location

Nucleus

Tissue Location

Widely expressed with highest levels in skeletal muscle, heart and kidney. Also expressed in the liver pancreas and placenta. Widely expressed throughout the brain

NMNAT1 Antibody (C-Term) - Protocols

Provided below are standard protocols that you may find useful for product applications.
