

Phospho-CDC6(S54) Antibody
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP3058a

Specification

Phospho-CDC6(S54) Antibody - Product Information

Application	WB, IHC-P,E
Primary Accession	Q99741
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG

Phospho-CDC6(S54) Antibody - Additional Information

Gene ID 990

Other Names

Cell division control protein 6 homolog, CDC6-related protein, Cdc18-related protein, HsCdc18, p62(cdc6), HsCDC6, CDC6, CDC18L

Target/Specificity

This CDC6 Antibody is generated from rabbits immunized with a KLH conjugated synthetic phosphopeptide corresponding to amino acid residues surrounding S54 of human CDC6.

Dilution

WB~~1:1000
IHC-P~~1:50~100

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Phospho-CDC6(S54) Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Phospho-CDC6(S54) Antibody - Protein Information

Name CDC6

Synonyms CDC18L

Function Involved in the initiation of DNA replication. Also participates in checkpoint controls that

ensure DNA replication is completed before mitosis is initiated.

Cellular Location

Nucleus. Cytoplasm Note=The protein is nuclear in G1 and cytoplasmic in S-phase cells (PubMed:9566895).

Phospho-CDC6(S54) Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

Phospho-CDC6(S54) Antibody - Images

The anti-Phospho-CDC6-S54 Pab (Cat. #AP3058a) is used in Western blot to detect Phospho-CDC6-S54 in Ramos tissue lysate

Formalin-fixed and paraffin-embedded human cancer tissue reacted with the primary antibody, which was peroxidase-conjugated to the secondary antibody, followed by AEC staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated. BC = breast carcinoma; HC = hepatocarcinoma.

Phospho-CDC6(S54) Antibody - Background

The protein encoded by this gene is highly similar to *Saccharomyces cerevisiae* Cdc6, a protein essential for the initiation of DNA replication. This protein functions as a regulator at the early steps of DNA replication. It localizes in cell nucleus during cell cycle G1, but translocates to the cytoplasm at the start of S phase. The subcellular translocation of this protein during cell cycle is regulated through its phosphorylation by Cdks. Transcription of this protein was reported to be regulated in response to mitogenic signals through transcriptional control mechanism involving E2F proteins.
