

**Phospho-Nephrin(Y1210)) Antibody**  
**Affinity Purified Rabbit Polyclonal Antibody (Pab)**  
**Catalog # AP3747a**

**Specification**

---

**Phospho-Nephrin(Y1210)) Antibody - Product Information**

Application	DB,E
Primary Accession	<a href="#">O60500</a>
Other Accession	<a href="#">NP_004637.1</a>
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	134742

**Phospho-Nephrin(Y1210)) Antibody - Additional Information**

**Gene ID** 4868

**Other Names**

Nephrin, Renal glomerulus-specific cell adhesion receptor, NPHS1, NPHN

**Target/Specificity**

This Nephrin Antibody is generated from rabbits immunized with a KLH conjugated synthetic phosphopeptide corresponding to amino acid residues surrounding Y1210 of human Nephrin.

**Dilution**

DB~~1:500

**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

Phospho-Nephrin(Y1210)) Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**Phospho-Nephrin(Y1210)) Antibody - Protein Information**

**Name** NPHS1

**Synonyms** NPHN

**Function** Seems to play a role in the development or function of the kidney glomerular filtration

barrier. Regulates glomerular vascular permeability. May anchor the podocyte slit diaphragm to the actin cytoskeleton. Plays a role in skeletal muscle formation through regulation of myoblast fusion (By similarity).

#### Cellular Location

Cell membrane; Single-pass type I membrane protein. Note=Predominantly located at podocyte slit diaphragm between podocyte foot processes. Also associated with podocyte apical plasma membrane.

#### Tissue Location

Specifically expressed in podocytes of kidney glomeruli

### Phospho-Nephrin(Y1210)) Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

### Phospho-Nephrin(Y1210)) Antibody - Images

Dot blot analysis of anti-Phospho-Nephrin (Y1210) antibody Phospho-specific Pab (Cat. #AP3747a) on nitrocellulose membrane. 50ng of Phospho-peptide or Non Phospho-peptide per dot were adsorbed. Antibody working concentrations are 0.6ug per ml.

### Phospho-Nephrin(Y1210)) Antibody - Background

This gene encodes a member of the immunoglobulin family of cell adhesion molecules that functions in the glomerular filtration barrier in the kidney. The gene is primarily expressed in renal tissues, and the protein is a type-1 transmembrane protein found at the slit diaphragm of glomerular podocytes. The slit diaphragm is thought to function as an ultrafilter to exclude albumin and other

plasma macromolecules in the formation of urine. Mutations in this gene result in Finnish-type congenital nephrosis 1, characterized by severe proteinuria and loss of the slit diaphragm and foot processes.
