

Phospho-eEF2k (Ser366) Antibody
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP3916a**Specification**

Phospho-eEF2k (Ser366) Antibody - Product Information

Application	WB,E
Primary Accession	O00418
Reactivity	Human
Host	Rabbit
Clonality	polyclonal
Isotype	Rabbit IgG
Calculated MW	82144

Phospho-eEF2k (Ser366) Antibody - Additional Information**Gene ID** 29904**Other Names**

Eukaryotic elongation factor 2 kinase, eEF-2 kinase, eEF-2K, 2.7.11.20,
Calcium/calmodulin-dependent eukaryotic elongation factor 2 kinase, EEF2K

Target/Specificity

This Phospho-eEF2k (Ser366) antibody is generated from a rabbit immunized with a KLH conjugated synthetic peptide between 337-371 amino acids from the human region of human EEF2k.

Dilution

WB~~1:500

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Phospho-eEF2k (Ser366) Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Phospho-eEF2k (Ser366) Antibody - Protein Information**Name** EEF2K

Function Threonine kinase that regulates protein synthesis by controlling the rate of peptide chain elongation. Upon activation by a variety of upstream kinases including AMPK or TRPM7,

phosphorylates the elongation factor EEF2 at a single site, renders it unable to bind ribosomes and thus inactive. In turn, the rate of protein synthesis is reduced.

Phospho-eEF2k (Ser366) Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

Phospho-eEF2k (Ser366) Antibody - Images

Western blot analysis of lysates from HeLa cell line, untreated or treated with TPA, 200nM, using (Cat. #AP3916a)(upper) or Beta-actin (lower).

Phospho-eEF2k (Ser366) Antibody - Background

Threonine kinase that regulates protein synthesis by controlling the rate of peptide chain elongation. Upon activation by a variety of upstream kinases including AMPK or TRPM7, phosphorylates the elongation factor EEF2 at a single site, renders it unable to bind ribosomes and thus inactive. In turn, the rate of protein synthesis is reduced.
