

#### **Histone Antibody (1F0)**

Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP50646

#### **Specification**

### Histone Antibody (1F0) - Product Information

Application WB
Primary Accession P07305
Reactivity Human
Host Rabbit
Clonality Polyclonal
Calculated MW 21 19 KDa
Antigen Region 85-112

## Histone Antibody (1F0) - Additional Information

**Gene ID 3005** 

#### **Other Names**

Histone H10, Histone H1', Histone H1(0), Histone H10, N-terminally processed, H1F0, H1FV

#### Dilution

WB~~1:1000

### **Format**

Rabbit IgG in phosphate buffered saline (without Mg2+ and Ca2+), pH 7.4, 150mM NaCl, 0.09% (W/V) sodium azide and 50% glycerol.

# **Storage Conditions**

-20°C

### Histone Antibody (1F0) - Protein Information

# Name H1-0 (HGNC:4714)

#### **Function**

Histones H1 are necessary for the condensation of nucleosome chains into higher-order structures. The histones H1.0 are found in cells that are in terminal stages of differentiation or that have low rates of cell division.

#### **Cellular Location**

Nucleus {ECO:0000255|PROSITE-ProRule:PRU00837, ECO:0000269|PubMed:18993075}. Chromosome {ECO:0000255|PROSITE- ProRule:PRU00837, ECO:0000269|PubMed:18993075}. Note=The RNA edited version has been localized to nuclear speckles. During mitosis, it appears in the vicinity of condensed chromosomes

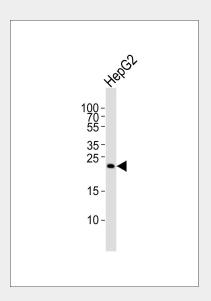

### Histone Antibody (1F0) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

### Histone Antibody (1F0) - Images

Western blot analysis of lysate from HepG2 cell line,using Histone Antibody (1F0)(AP50646). AP50646 was diluted at 1:1000. A goat anti-rabbit IgG H&L(HRP) at 1:5000 dilution was used as the secondary antibody.Lysate at 35ug.

### Histone Antibody (1F0) - Background

Histones H1 are necessary for the condensation of nucleosome chains into higher-order structures. The H1F0 histones are found in cells that are in terminal stages of differentiation or that have low rates of cell division.
